Educational Philosophy/School District Mission (Governing Board Goals)

Vision
Power in the preparation... Excellence in the journey... Success for a lifetime...

Mission
The mission of Dysart Unified School District is to create a safe, diversified and engaging learning environment where every student attains academic excellence and is empowered to achieve lifelong success.

Through relevant and challenging curriculum, expanded learning opportunities and collaborative partnerships our students will be

- effective communicators.
- critical and creative thinkers.
- informed problem solvers and decision makers.
- responsible leaders.
- productive citizens.

Adopted: July 13, 2011 LEGAL REF.: Arizona State Constitution, Article XI, Section 1

Strategic Plan
The Dysart Unified School District Strategic Plan provides the district a road map for excellence. The plan, which represents hundreds of hours of true community partnership, outlines goals and objectives which provide a clear direction for the Dysart School District.

The Dysart Strategic Plan addresses four major goals and objectives to drive the district forward down the path for excellence. The four goals include:

GOAL A: Academics
GOAL B: Culture and Leadership
GOAL C: Safety
GOAL D: Resources

The Strategic Plan is a living document that evolves as the district continually tracks, measures and celebrates the successes outlined within the document.

Equal Opportunity
The Dysart Unified School District No. 89 is an Equal Employment Opportunity Employer in compliance with Title VI of the Civil Rights Act of 1964, Civil Rights Act Title VII of 1972, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA) of 1990. Dysart Unified School District does not discriminate on the basis of race, color, religion, national origin, sex, disability or age in employment or in any of its educational programs or in the provisions of benefits and services to students.

DYSART UNIFIED SCHOOL DISTRICT No. 89 IS AN EQUAL OPPORTUNITY ORGANIZATION
Counseling
A comprehensive school counseling program is offered at all high schools to promote and enhance the learning process. DUSD school counseling programs facilitate student development in academics and career guidance. Students will develop an Educational Career Action Plan (ECAP) that reflects current plan of coursework, career aspiration and extended learning opportunities.

Structured English Immersion (SEI) / English Language Development (ELD)
The SEI/ELD program serves the needs of students whose native language is not English and who have not yet achieved a composite level of proficiency on the AZELLA. English learners are tested before entry into the program.

Special Education
Students eligible for special education programs have access to all of the courses offered in the regular education curriculum. Courses designed to meet the unique needs of special education students have also been developed and are provided for those students who need them. Students receiving special education services complete a course of study that meets graduation requirements as prescribed in their Individual Education Plans. Each plan is evaluated and reviewed annually by the students’ multidisciplinary team.

Signature Programs
Each high school offers Signature Courses, which are academic and career-related and which focus on post-secondary opportunities. (Descriptions for these courses may be found at the end of this section.) Enrollment in signature courses falls under the Open Enrollment Guidelines if a student does not live within the school boundaries of that high school. Some signature programs may be available after school for enrollment by students from other campuses. Transportation is not provided for students who are open enrolled.

Open Enrollment
Arizona state law allows students to apply for admission to any state public school based on available classroom space. Any family in Arizona may apply for Open Enrollment into a Dysart school. Open Enrollment applications are approved on a year-by-year basis with no guarantee of continued enrollment. Open enrollment applications are only available online at www.dysart.org. Students will be notified if the application has been accepted, wait-listed or denied. We continue to accept open enrollment applications throughout the school year. Students who have submitted applications will be considered in accordance with District Policy Section 10 - Students.

iSchool
iSchool provides Arizona students with expanded academic options by offering online classes. Through the online class delivery, students from all areas of our state have access to classes. All iSchool classes meet the curriculum content standards that are set forth by the Arizona Department of Public Education, and all of our classes meet the recognized quality assurance standards for online learning classes. Students are taught by Dysart’s appropriately certified teachers. The Collaborative Commons is located in each of the High School Media Centers. Online instructors are available in the commons throughout the day for student support as well as some after school and evenings for additional support. Students can attend as full time online students or take various courses in addition to the courses on campus. The courses offered are for High School credit. Registration occurs through the counselors. In order to receive iSchool credit the student must receive a 60% or better on the final exam. The exam must be taken with a school instructor. All notes used must be handwritten.

Alternative High School Program
The Dysart Unified School District has an alternative education program. The Sundown Mountain Alternative Education Program is housed at the Dysart Learning Center. Transportation is available. Students must be referred through their home school. The home school counselor may be contacted for more information. Sundown Mountain offers a selection of courses which enable students to earn their high school diploma.
Honors Classes*
Honors courses provide an in-depth study and are designed to prepare students for Advanced Placement and International Baccalaureate courses. Teacher recommendation, grades and test scores are considered for eligibility in the course. Check with your student’s counselor for placement.

The International Baccalaureate Program (IB)
International Baccalaureate (IB) is an internationally recognized course of study. It is designed for highly motivated students interested in a rigorous academic program. Students with excellent grades, high test scores, and a strong work ethic are good candidates for IB. This program is offered at Willow Canyon High School. Course information can be found on p. (update)

Advanced Placement (AP)
The Advanced Placement Program is offered at all DUSD high schools, offering students college level courses. In Advanced Placement Courses (AP), students can earn college credit by earning qualifying AP exam scores, There is a fee to the College Board of approximately $91 to take the test. There are scholarships and reduced fee waivers available. If your child received a 3 or higher, universities may award college credits. Receiving a 3 or more on the AP exam will also allow student to earn a higher grade in the class.

Cambridge Program
Cambridge courses are offered in over 100 countries and recognized by higher education institutions worldwide. The Cambridge program encourages student-centered learning and hands-on application of skills. Clearly defined learner outcomes and content ensure high expectations for all. Cambridge students are:

- Confident in working with information and ideas – their own and those of others.
- Responsible for themselves, responsive to and respectful of others.
- Innovative and equipped for new and future challenges.
- Engaged intellectually and socially; ready to make a difference.

Students who complete the lower division, 9th-10th grade, Cambridge curriculum are set for success in a dual enrollment, AP, IB, or CTE pathway for college and career advancements. By passing the Cambridge Board Examinations students are eligible for the Grand Canyon Diploma Credential, a diploma-credential that allows them early entry into community college courses and may earn higher grades based on examination scores. For further information related to the use of Cambridge assessments and data, refer to the Student and Parent Handbook.
DUAL ENROLLMENT OFFERINGS

Advanced Photoshop
American National Government
Calculus w/Analytic Geometry I
Chemistry I
College Algebra
Commercial Baking Techniques
Computer Graphics: Adobe Photoshop

*Dual Enrollment classes are dependent upon teacher availability.*
Graduation Requirements

Dysart Unified School District

- English - 4 credits
  (English 1-2, 3-4, 5-6, 7-8)
- Math - 4 credits
  (Algebra 1-2, Geometry 1-2, Algebra 3-4 and one additional math course that includes significant mathematics content)
- Science - 3 credits
  (See chart on page 24)
- Social Studies - 3 credits
- P.E./Health - 1 credit*
- Fine Arts or CTE - 1 credit
- Electives - 6 credits*

Total 22 credits**

*P.E./Health credit can be fulfilled by Marching Band, Color Guard (starting 2015-16), Dance, Show Choir, Introduction to Theater or ROTC courses

**Please Note: All graduation requirements shall be strictly enforced by year of graduation, NOT by a cohort.

http://www.azed.gov/state-board-education/high-school-graduation-requirements/

Arizona Universities

- English - 4 credits
  (English 1-2, 3-4, 5-6, 7-8)
- Math - 4 credits
  (Algebra 1-2, Geometry 1-2, Algebra 3-4, and one additional math course with Algebra 3-4 as a prerequisite)
- Lab Science - 3 credits
  (See chart on page 24)
- Social Studies - 2 credits
  (U.S. History and one other)
- Foreign Language - 2 credits
- Fine Arts or CTE - 1 credit

Commencement Participation
A student may not participate in the commencement ceremony until all graduation requirements have been met and the checkout sheet is completed and approved. Fees involved with the commencement program are the responsibility of the student. Participation is optional.

Early/Delayed Graduation
1. “Early Graduation Request” forms are available in the counseling office.
2. Request for sixth semester graduation must be submitted during junior year course selection.
3. Early graduation transcripts may be obtained through http://www.parchment.com will be available upon completion of requirements. The awarding of diplomas will occur quarterly when all graduation requirements have been met. Students failing to meet graduation requirements by the commencement date will not be eligible for early graduation.
4. Students are responsible for communicating with their counselor to assure that all course credits are earned prior to graduation.
5. Transcripts verifying credits completed online or through other outside options must be submitted to the home high school registrar two weeks prior to the graduation date.
6. Students who are Junior early graduates will only be ranked within their current cohort. They will not be ranked within a graduating senior class cohort.

Move on When Ready
The Arizona state ‘Move On When Ready’ legislation provides a pathway to graduation with the Grand Canyon High School Diploma Credential.

This pathway relies on board examination systems. Achievement of a Grand Canyon Diploma Credential will signify that students are college and career ready. Students interested in earning the Grand Canyon Diploma Credential need to enroll in the lower division (9th and 10th grade) Cambridge courses offered at Dysart High School or Willow Canyon High School. Students must pass all Cambridge Board examinations.

Civics Test - Graduation Requirement
The State of Arizona requires students to pass a civics test in order to graduate high school. Students must score at least a 60% or higher on a test civics portion of the naturalization test used by the United States Citizen and Immigration Services.

CPR Requirement
Prior to graduation, student must be provided 1 or more training sessions in cardiopulmonary resuscitation (CPR) or provide a CPR certification card.
Students planning to attend a university should plan with their counselor to ensure they have the required courses as well as the required exams (normally ACT or SAT) to meet the entrance requirements.

- Rigorous courses have additional value for acceptance.
- Dual enrollment and AP courses are recognized differently.
- ACT or SAT must be taken prior to graduation.

To qualify for Assured Admittance to a state university in Arizona a student must meet one or more of the following criteria:

- Have a 3.0 (B) minimum unweighted grade point average (GPA) in competency courses*
- Rank in the top 25% of his/her high school class
- Achieve a minimum SAT 1 score of 1040
- Achieve a minimum ACT score of 22

In addition, students must have no deficiencies in the required core competency areas. To be considered for admission to a state university in Arizona students must:

- Have a 2.5 (C) minimum unweighted grade point average in competency courses* or rank in the top 50% of their high school class.
- Have no more than one deficiency in two areas, except both not in mathematics and laboratory sciences.
- Have a minimum GPA of 2.0 for each competency area.

* The GPA is calculated using only the 16 core courses.

Competency Courses:
- 4 units of English (English I, II, III, IV)
- 4 units of mathematics (Algebra I, Geometry, Algebra II, Advanced Math for which Algebra II is a prerequisite)
- 3 units of laboratory science (one unit in at least three of the four areas - biology, chemistry, physics, earth science. An integrated lab science course may be allowed for one (1) of the three (3) required courses. An advanced level course in the last two years can be used for a third unit)
- 2 units social science (Dysart requires 3 units) - at least one unit in American History
- 2 units of the same foreign language
- 1 unit of fine arts or any combination of 2 semesters of Fine Arts or CTE

The Dysart School District provides the following testing schedule to allow students the opportunity to participate in career exploration, college entrance, and military and individual goal attainment.

Sports in College
Students who plan to play athletics in college for NCAA D-1 or D-II level schools should review requirements at the NCAA Eligibility Center at www.Eligibilitycenter.org. Also, students interested in playing championship sports at NAIA colleges need to register and receive an eligibility determination at http://www.Playnaia.org. Any credit recovery or credit improvement courses need to be approved by a counselor. Core courses offered through DUSD iSchool have been approved by the NCAA. However, the NCAA does NOT approve DUSD iSchool courses designated as “credit recovery” courses. Potential NCAA athletes should not sign up for any course designated “credit recovery”.

Academic Standards
The National Collegiate Athletic Association (NCAA) Eligibility Center verifies the academic and amateur status of all student-athletes who wish to compete in Division I or II athletics. College-bound student-athletes who want to practice, compete and receive athletically related financial aid during their first year at a Division I or II school need to:

- Graduate from high school.
- Complete a minimum of 16 core courses for Division I or II. Earn a minimum required grade-point average in core courses.
- Earn a qualifying test score on either the ACT or SAT.
- Request final amateurism certification from the NCAA Eligibility Center.

For Division I student-athletes prospects must also:

- Earn at least a 2.3 grade-point average in core courses.
- Meet an increased sliding scale standard (for example, an SAT score of 820 requires a 2.5 high school core course GPA).
- Successfully complete 10 of the 16 total required core courses before the start of their senior year in high school. Seven of the 10 courses must be successfully completed in English, math and science.

Prospects that earn between a 2.0 and 2.3 GPA and meet the current sliding scale standard (for example, an SAT score of 1,000 requires a 2.025 high school core course GPA) will be eligible for practice and athletically related financial aid but not competition. Division III college and universities set their own admission standards. The NCAA does not set initial eligibility requirements in Division III.
Official Transcripts  [http://www.parchment.com](http://www.parchment.com)
Credits from AdvancED Accredited Institutions will be evaluated before credits are entered in the student’s course history. Once credit is posted to the transcript, it will not be deleted. Class rank is updated on a continual basis, known as “rolling rank”. The current graduating class rank is based on the 7th semester ranking.

College Concurrent Enrollment
Only pre-approved courses may be accepted from college for high school credit. This approval must be done through high school administration. Only courses level 100 and above may be transferred. Students must provide official transcripts to receive credit. The grade earned for the course will apply towards the student’s grade point average and class rank.

Credit Minimums
Students must show proof of enrollment in the minimum number of credits needed for graduation. Students should meet with their counselors to complete an Education and Career Action Plan (ECAP) to allow them to meet at least the minimum requirements* for graduation. A total of 22 credits is the minimum required for graduation.

*Prior administrative approval is needed for off-campus community college classes to be included in these minimum credit requirements.

Core Credits Required for Graduation
Students must take any required courses remaining for graduation during their senior year at their home school unless permission is explicitly granted by the principal. This is to ensure that students receive the guidance they need to fulfill course requirements and graduate on time.

Credit Maximums
Additional opportunities may be explored through correspondence courses (correspondence credits limited to four) and/or enrollment in college courses. No more than four credits may be approved at any one time for currently enrolled students. Exceptions may be approved by the home school principal. (Reference: Arizona Administrative Codes R7-1-302.04 and R7-2-601).

Independent Study Credit
Independent study will be under the supervision of the school administration. There is a limit of one course per semester. Prior written approval of the department chair, supervising teacher and the assistant principal is necessary before enrollment. Independent study credit is open only to juniors and seniors holding a G.P.A. of 3.0 or higher in the department from which the course is developed and supervised. An exception to G.P.A., grade level and course selection may be granted by the principal. Honors, Accelerated, AP, and IB courses are not available for independent study. Exceptions may be approved by the principal.

NOTE: The National Collegiate Athletic Association does accept Independent Study credit to satisfy eligibility requirements.
Repeating Courses
Courses that may be repeated for credit are noted in the Course Selection Guide in the course descriptions.

Re-taking Courses for Grade Improvement
Courses designed to be taken once may be retaken. Transcripts for students repeating these courses will reflect all grades earned for that course. Only the highest grade will be used in computing the G.P.A., and credit will be given for the higher grade. Classes that are labeled Credit Recovery (CR) may ensure the student has credit, but may not be accepted by universities.

Distance and Online Education
In addition to traditional methods of course delivery, courses may also be offered through distance education. Distance education is defined as instructional learning arrangements in which the distance education instructor and the student are separated geographically. Instruction is delivered by means of telecommunications technologies such as satellite, microwave, telephone, cable, or fiber optics. The instruction, which may supplement or supplant an entire course, provides for two-way interactive communication between the instructor and the student during the time of the instruction. Communication or interaction occurs through the use of technologies such as voice, video or computer-mediated communications. See credit maximums, p. 13. All Dysart iSchool online classes can be taken for either core or elective credit. As of May 15, 2011, current DUSD students who choose to enroll in online classes outside of the Dysart iSchool program will earn only elective credit. A student may request to take an examination for any core subject completed. Examinations must be taken within 90 calendar days of the request. If the student earns a score that demonstrates competency (70% or higher), the high school will accept the transferred credit as core subject credit.

Testing out for Credit
The following are guidelines for students requesting to test out of (challenge) a course they have not yet taken for credit. This process is intended for courses required for graduation. Students transferring from a charter, private or homeschool situation may choose to test out of any core high school class for credit. However, the principal may allow this process to be used for elective classes if the department chair or teacher of record agrees that the elective course can appropriately be challenged.

1. The student meets with a counselor. This process must be completed within the first ten days of entering the course for continuing students or the first ten days upon enrollment for transferring students. The principal may waive the time requirement if special circumstances exist.
2. The Department Chair will administer the challenge exam and score. This process is expected to be completed within five days of the meeting identified in step one. Students may only challenge a course once; however, they may choose to enroll in the class if they are not happy with the grade that the test would produce on their transcript. It is the responsibility of the department chair to complete the necessary paperwork with the results to the school administration.
3. Students may not test out of a class which is at a lower level than a course they have already completed within a specific department.
4. Student may not test out of Honors Classes.
Registration Process

A. Students request courses through the course selection process.
B. Courses with insufficient enrollment are cancelled, and students are given an alternate course selection.
C. Scheduling conflicts are resolved through alternate course selections.

Schedule Changes

We encourage students to consider the courses they select very carefully during the course selection period. The school master schedule is created after all students have selected their courses and is based on the total number of course requests.

Schedule changes will be considered only in the case of incorrect placement or other valid reasons listed below. Schools cannot accommodate requests to change teachers, with the exception of cases where a student has previously failed a particular teacher’s class. When dropping or adding, specific procedures must be followed and will be accommodated based on need or availability.

A. Valid reasons for schedule changes are:
   a. Errors appearing on computer schedules.
   b. Changes needed to meet graduation requirements.
   c. Failure of a prerequisite course.
   d. Changes required for the health of student. (Doctor’s documentation necessary.)
   e. Successful completion of accredited course prior to the beginning of the current term.
B. Parents may appeal a denial for schedule change to the school administration. The decision of the school administration will be final.
C. Level changes may be considered when recommended by the teacher and approved by the administration.
D. Administrative changes to balance classes or correct student misplacement will be made as soon as possible.
E. AP and Honors classes cannot be dropped after the first 9 weeks without principal approval.

Late Enrollment

Late enrollment decisions will be reviewed by the school administration.

- Students who enroll after the 10th day of school who do not bring transfer grades, will be placed on audit status for the remainder of the semester.
- Students on audit status may earn credit based on their performance.
- Students who enroll after the 6th week, who do not bring transfer grades, may not be eligible for credit.

A late-start form is required.
GRADE REPORTING

Report Cards/Progress Reports
Official report cards/progress reports are posted on the Parent Portal eight times a year, four each semester. Parents can access the Parent Portal at www.dysart.org. Only the final grades on the first and second semester report cards are recorded on the official transcript.

The district grading scale on report cards reads:

A - 90%  B - 80%  C - 70%  D - 60%  F - below 60%

Appeal of Grades
See district procedures on the Dysart website.

Loss of Credit Appeal
Any student who is on audit status or enrolls without transfer grades may petition for a credit appeal.

Grade Point Average (G.P.A.)
Numeric equivalents used to calculate Grade Point Average (G.P.A.) are as follows

<table>
<thead>
<tr>
<th>Unweighted (NON Honors/IB/AP)</th>
<th>Weighted (Honors/IB/AP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = 4 points</td>
<td>A = 5 points</td>
</tr>
<tr>
<td>B = 3 points</td>
<td>B = 4 points</td>
</tr>
<tr>
<td>C = 2 points</td>
<td>C = 3 points</td>
</tr>
<tr>
<td>D = 1 point</td>
<td>D = 2 point</td>
</tr>
<tr>
<td>F = 0 points</td>
<td>F = 0 points</td>
</tr>
</tbody>
</table>

The Grade Point Average (G.P.A.) is determined by the sum of the numeric equivalents for the grades divided by the total number of semester classes.

Weighted G.P.A. is used only to determine class rank. Unweighted G.P.A. is used for admission to most colleges and universities and for scholarships at in-state schools. Class rank is updated on a continual basis, known as “rolling rank.” Class rank for graduation will be based on a student’s seventh semester G.P.A.
In order to implement a system of grading that reflects student performance rather than compliance, Dysart’s grading guidelines require performance on assessments to account for 80% of a student’s final grade. It is important to note that assessments are not restricted only to summative tests and exams. They include any number of measures to evaluate learning over the course of the grading period such as formative work, benchmark assessments and quizzes, writing assignments, progress monitoring, projects, labs or other rubric based assignments. In courses that include a project-based learning assessment component, student performance in tasks related to the project may account for up to 20% of the total course grade (reducing the assessment share described above to 60%). Since these projects often encompass several days or weeks of student work, a series of grades may be given to one project in order to reflect the project’s essential components. Under the grading guidelines, final exams account for no more than 10% of a student’s grade. Likewise, homework, class work and other “practice” activities do not exceed 10% of a student’s final grade. The critical element of this policy – and perhaps the one which represents the greatest change – is that students are now permitted (and encouraged) to retake assessments. Retaking an assessment is another opportunity for a student to demonstrate content mastery and may be a teacher’s best chance to capture authentic measures of learning. This means that grade books “roll” throughout the grading period. Posted grades reflect the best of all assessments attempts. The chance to retake an assessment is not unconditional, however. Students must also have completed 80% or more of the class work/homework corresponding to an assessment and must provide the classroom teacher with documentation that they have received additional support for the assessment they wish to retake. Assuming a student has met these supports and assignment conditions, he or she may continue to re-test for content mastery up to four weeks from the original assessment or no later than the end of the quarter. Note, the re-test may appear in a different format than the original test.

AP, IB and Cambridge Classes
If a student participates in the AP, IB or Cambridge exam, the student is not required to take the course final. If the score on the AP exam is a 3, the student’s grade gets moved up by one letter grade. If a student scores a 4 or 5 on the AP exam, the student will automatically earn an “A” in the AP course. If the score on the IB exam is a 4, the student’s grade gets moved up by one letter grade. If a student scores a 5, 6, or 7 on the IB exam, the student will automatically earn an “A” in the IB course. If a student’s score on the Cambridge exam is a “C” or “B,” the student’s final grade gets moved up one grade level (except for the FLE English Course). If a student’s score is an “A” or “A,”* the student will automatically earn an “A” for the final course grade. No final course grade changes are made for any exam grade below a “C.” For the Cambridge FLE English Course, only an “A” or “B” will qualify for the grade-level change. In the FLE English Course, an exam grade of a “C” does not qualify for the grade-level change. *For more information about the grading guidelines, parents are invited to watch the video produced for students, families and community. It can be found by visiting www.dysart.org.

*For more information about the grading guidelines, parents are invited to watch the video produced for students, families and community. It can be found by visiting www.dysart.org.

ATTENDANCE AND CREDIT

Legal Requirement
Arizona law requires students to attend school through the completion of the tenth grade or to age sixteen.

Excessive Absences
A student must attend class regularly to receive a passing grade. A student who is absent from a class more than ten (10) times per semester may be placed on audit status. The student and/or parent may petition for credit appeal.

Student Earning Privileges
Beginning with the class of 2020 (freshman class of 2016-17): to earn the following privileges, students must have earned credits to qualify as a junior or senior: Parking Pass, Prom

Beginning with the 2016-17 school year: to earn early release, seniors must be on track with credits for graduation with their cohort.
Enrollment Rule
If a student's initial enrollment occurs after the fourteenth official day of the semester, he/she is ineligible for that semester. In case of initial enrollment after the first official school day and by the fourteenth official school day, a student shall have been in attendance for as many days as he/she missed from the opening day of the semester before eligibility can be established. If you have been enrolled in school for fifteen or more days during any one semester, it will count as one of the eight semesters of high school attendance during which you may possibly have eligibility. Exception: A school district governing board may declare all or certain high schools within its district as open schools. A student enrolling for the first time in any open school in the district shall have met the domicile requirements to be able to participate in interscholastic competition.

Domicile Rule
Except as otherwise stated in Arizona Interscholastic Association Bylaws, you, whether an adult or not, are privileged with eligibility for interscholastic competition only at the school in the district in which your parents are domiciled. In multi-school districts, you are eligible only at the school in the attendance zone in which your parents are domiciled.

Age Limit/Birth Record Rule
If you become 19 years of age on or before September 1, you are NOT eligible for any part of that school year. You must submit an acceptable record of birth before your name is placed on an eligibility list for varsity competition.

Physical Examination Rule
You must have a physician's record of physical examination on file with the principle stating that you are physically fit for interscholastic athletic competition. Your physical examination for the following year must be given on or after March 1. Arizona law mandate that schools provide concussion education to students, parents and coaches. Student athletes will need to take the AIA approved Brainbook concussion course prior to participating in practice or competition for their sport. The concussion course needs to be taken one time only.

Academic Rule
A student must be enrolled in a minimum of four courses per semester the first six semesters of high school and a minimum as determined by the district during the seventh and eighth semesters.

Parent or Legal Guardianship Rule
You must get signed permission to participate from your parents or guardian on a form provided by the school.

Maximum Participate Rule
After you first enroll in the ninth grade, you have a maximum of eight semesters of opportunity and maximum of four seasons of opportunity in each sport or activity. The seventh and eighth semester must be consecutive. The other semesters need not be consecutive. Enrollment for at least fifteen school days during any semester, or participation in any interscholastic contest, constitutes a semester of opportunity and a season of opportunity.

Transfer Rule
If you move with your parents to a new school district, you will be eligible at your new school provided you meet all other eligibility requirements. If you transfer schools and your parents do not move into the district of your new school, you will be ineligible for 365 days.

Amateur Rule
You must be an amateur. This means that you have never used and are not using your knowledge of athletics or athletic skill in an athletic contest for financial gain. Amateur athletes shall participate and always have participated under their own name.

See AIA Bylaw 15.10 [http://aiaonline.org/files/65/article-15-student-eligibility-rules.pdf](http://aiaonline.org/files/65/article-15-student-eligibility-rules.pdf). Students are eligible to tryout for the high school Spiritline during the season of activity, which is defined as the first week of football practice, once they are enrolled at the high school.
AVID: Advancement Via Individual Determination
AVID, an international program to increase student performance, is a four-year program for students who are capable of completing the most rigorous curriculum but are falling short of achieving their academic potential. AVID students are required to be enrolled in the school's toughest classes such as Advanced Placement as well as enrolled in the AVID elective throughout their high school career. The AVID elective provides academic instruction and support to prepare students for eligibility and success at a four-year college or university. AVID topics include note-taking, study skills, test taking, time management, college exam preparation, critical reading skills, inquiry and collaboration. The AVID program is only offered to those students who meet specific criteria and who are selected through an application and interview process.

Transportation Technologies
Automotive Technology
The Automotive Technology program is designed to provide students the opportunity to gain knowledge and experience to diagnose and repair problems involving the brake system, engine, electrical system and suspension system of a vehicle. The capstone course in the program prepares students for the industry standard ASE certification.

Courses include: Automotive Technology 1-2, 3-4, 5-6 Honors, 7-8 Honors, Automotive Technologies Internship

Cambridge Program
International General Certificate of Secondary Education

Courses include: See pp. 26-28.

JROTC
The JROTC program helps prepare high school students for various responsible leadership jobs of choice in the civilian workforce, private enterprise or military service. The mission of JROTC is “to motivate young people to be better citizens.” JROTC consists of both classroom and field experience. As a JROTC cadet, students will earn the privilege of participating in Spring Camp and Summer Camp. JROTC is an adventure in learning.

Competitive JROTC teams include: Raiders, Color Guard, Rifle, & Drill.

Communications Media:
Photo Imaging
Photo Imaging provides students interested in areas such as Photo Journalism, Still Photography, Portraiture, or Digital Media an opportunity to gain experience with the latest graphic software, digital cameras, and studio equipment. Students will develop individual portfolios, have an opportunity to display their work, and, in the Intermediate and Advanced courses, expand their business sense by finding and serving actual clients both on and off campus. All students may elect to take the Adobe Certified Associate (ACA) exam, which is the graphic design industry’s benchmark test.

Courses include: Photo Imaging 1-2, Photo Imaging 3-4 & Photo Imaging 5-6 Honors, Digital Photography Internship
Engineering Sciences:

Engineering

Students in this field will explore careers in technology, industry, and engineering. Students will explore entry, semi-professional, and professional levels of careers through hands-on projects in the area of engineering (transportation, electrical, mechanical, civil, power and construction). They will also participate in class activities and projects and hear speakers in the areas of engineering technology and industrial careers.

Courses include: Engineering 1-2, 3-4 and Engineering 5-6, 7-8 Honors, Engineering Internship

The AVID program is only offered to those students who meet specific criteria and who are selected through an application and interview process.

Family and Consumer Sciences:
Culinary Arts
If you are interested in working with food, cooking a variety of menu items, and amazing patrons with the quality and display of culinary delights, then the Culinary Arts Program is for you. Culinary Arts provides students with the opportunity to learn how to prepare gourmet foods, how to display food to make it pleasing to the eye, and develop the skills for state and national competition. Students will plan and present culinary events for both the school and the community. The high school is in partnership with Estrella Mountain Community College to provide dual enrollment credit for the program. This program will assist high school students in meeting the Arizona’s Career and Technical Education (CTE) standards and create post-secondary opportunities to meet the workforce needs of the culinary industry.

Courses include: Culinary Arts 1-2, 3-4, Culinary Arts Baking and Pastry 5-6 Honors, Culinary Arts Internship

Public Service Careers:
Fire Science
The training needed to help others is now available in the Fire Science program. Classroom and field activities in partnership with the City of Surprise Fire Department will provide students with a working knowledge and experience to be successful in the fire fighting career field. Courses are eligible for Dual Enrollment credit with Maricopa Community Colleges.

Courses include: Fire Science and Fire Science 3-4 Honors, Fire Science Internship

Law and Public Safety:
If you ever dreamed of being a police officer, now is the time to live that dream through the Law Enforcement and Public Safety Program. This program provides students with the opportunity to learn about and experience the skills needed to be a police officer. The high school is in partnership with the City of Surprise Police Department and the Maricopa County Community College District to provide internship opportunities and dual enrollment credit for the program. This program will provide high school students the knowledge to meet Arizona’s Career and Technical Education (CTE) standards and create post-secondary opportunities to meet the workforce needs of the Law and Public Safety industry.

Courses include: Law Enforcement 1-2, 3-4, 5-6, Law and Public Safety Internship
SIGNATURE PROGRAMS

Cambridge Program

International Baccalaureate Program (IB)
Willow Canyon is certified to offer the IB Diploma and coursework. The IB Program is a demanding pre-university course of study that leads to examinations. It is designed for highly motivated secondary school students aged 16 to 19. IB schools have earned a reputation for rigorous assessment, giving IB diploma holders access to the world’s leading universities. Students apply for the program for their junior and senior years. Once accepted, they are required to study both the humanities and sciences, and must select one subject from each of six groups – English, Second Language, Individuals and Society, Experimental Sciences, Mathematics and Computer Science, and the Arts. At least three, and not more than four, are taken at higher level (HL), the others at standard level (SL): HL courses represent a recommended minimum of 240 teaching hours, SL courses cover 150 hours. Courses include: See pp. 42-44.

Health Careers:
Medical Lab Assistant
Medical Lab Assisting is designed for students interested in any clinical-medical profession and offers hands-on experiences in the classroom lab including expertise in phlebotomy procedures, capillary punctures, urinalysis and blood smears. Upon successful completion of this course, students will have the opportunity to take two National Certification Exams for Medical Laboratory Assisting (CMLS) and Phlebotomy Technician (CPT).

Courses include: Medical Lab Assistant 1-2, Medical Lab Assistant Honors 3-4, Laboratory Assisting Internship

Nursing Professions
This one year program prepares students to work in various healthcare industries such as in-home healthcare, hospitals, hospice, etc., while preparing students to take the National Certified Nursing Assistant Exam to receive their Certified Nursing Assistant (CNA) License.

Communications Media:
TV / Media Production
This program is designed to provide students with the experience and skills needed to pursue a career in video production. Emphasis is given to training in all aspects of the video production “cycle” — pre-production, production and post-production. Included are experiences in effects, camera operation, composition, lighting and staging, on camera performance, directing, announcing and interviewing. Students gain experience with the latest in video software including sound and special effects. The video experience also includes exposure to green screens, multiple cameras and their platforms, various sound engineering equipment and professional grade dollies and jibs, thus preparing the student to move into the professional world of video production with a familiarity with industry standard experience. Students will complete the program with an all-encompassing portfolio having had multiple opportunities to compete, display their work and be assessed by clinicians, professionals in the field and in master classes.

Courses include: TV/Broadcast Production 1-2, 3-4 Honors, 5-6 Honors and IB Film 1-2, 3-4, Film & TV Internship
COURSE PATHWAYS

For English:

01
English Language Arts Pathways
- English 1-2
- English 1-2 Honors

### Description

**Cambridge IGCSE English/Language Honors 1-2 (1A, 1B, 1C, 1D, 2A, 2B, 2C, 2D)**  
Cambridge IGCSE English/Language develops the ability to communicate clearly, accurately and effectively in both speech and writing. Students learn how to employ a wide-ranging vocabulary, use correct grammar and develop a personal style and an awareness of the audience being addressed. Students are also encouraged to read widely, both for their own enjoyment and to further their awareness of the ways in which English can be used. Cambridge English/Language also develops more general analysis and communication skills such as synthesis, inference, and the ability to order facts and present opinions effectively. Students will compile a portfolio which will include 1.) an informative, analytical, and/or argumentative piece; 2.) an imaginative, descriptive, and/or narrative piece; and 3.) a response to a text or texts which contain facts, opinions and/or arguments that can be analyzed and evaluated by the candidate.

**Cambridge IGCSE English/Literature Honors 3-4 (1A, 1B, 1C, 1D, 2A, 2B, 2C, 2D)**  
The focus of Cambridge IGCSE English/Literature enables students to read, interpret and evaluate texts through the study of literature in English. They develop an understanding of literal meaning, relevant contexts and of the deeper themes or attitudes that may be expressed. Through their studies, students learn to recognize and appreciate the ways in which writers use English to achieve a range of effects enabling them to present an informed, personal response to the material they have studied. The syllabus also encourages the exploration of wider and universal issues, promoting students' better understanding of themselves and of the world around them. A portfolio will include two assignments, and the highly successful student will demonstrate an ability to sustain a perceptive and convincing response with well-chosen details and references to the text. The student will also demonstrate a clear critical/analytical understanding of the author’s intentions and the text's deeper implications as well as the attitudes it displays while communicating a considered and reflective personal response to the text.

**Cambridge IGCSE Mathematics I (US) Honors 1-2 (1A, 1B, 1C, 1D, 2A, 2B, 2C, 2D)**  
Cambridge IGCSE Mathematics I (US) Honors 1-2 (1A, 1B, 1C, 1D, 2A, 2B, 2C, 2D) This is an in-depth two-year honors mathematics class will require fluency in algebra and geometry. Cambridge IGCSE Mathematics (US) enables students to better understand the mathematical world of not only critical thinking and problem solving but also the practices and processes leading to advanced techniques of creativity, perseverance and limits of accuracy. Prior to this course, students should be fluent in foundational algebraic, geometric and statistical standards in order to extend their learning to more advanced concepts in such areas as operations of matrices, advanced functions, rational and polynomial expressions and sentences, trigonometry and vectors.

### Description

#### English 1-2
Students will study and apply the concepts and genres of literature as they read selections from across time periods and cultures. Students will apply grammar rules and acquire new vocabulary, while analyzing classic and contemporary fiction and nonfiction texts and composing narrative, expository, and argumentative writings.

#### English 1-2 Honors
Students will engage in rigorous academic activities related to the study of literature and non-fiction readings including in-depth analyses of concepts in literature as well as advanced composition assignments and additional in-class and out of class readings as preparation for the AP or IB programs.

#### English 3-4
Students will study and apply the concepts and genres of literature as they read selections from across time periods and cultures. Students will continue to apply grammar rules and acquire new vocabulary, while analyzing classic and contemporary fiction and nonfiction texts and composing narrative, expository, and argumentative writings.

The course is designed to target students who need improvement in both basic reading and writing skills with targeted strategies in written expression. This course introduces British or Contemporary Literature with an emphasis on composition and research methods. Students will continue to work on vocabulary, composition, revision and editing skills. Students will be assessed in reading literary and informational texts and in writing a multi-paragraph essay. This course will support students post-secondary transition plan.  
**Prerequisite:** As determined by student’s IEP  
**Credit:** 1  
**Location:** All | |
| **Literacy and Language Arts Essentials 1-2**  
Students will address basic reading, writing, speaking, and listening skills. Emphasis is on using 2 or more pieces of textual evidence to support the central idea and/or theme. It will also focus on determining meaning of words and phrases, reading and comprehending various types of literature, and conventions of narrative writing. This class is for students with significant disabilities who access the Arizona Alternative Academic Standards.  
**Prerequisite:** As determined by student’s IEP  
**Credit:** 1  
**Location:** All | |
| **Literacy and Language Arts Essentials 3-4**  
Students will address basic reading, writing, speaking, and listening skills. Emphasis is on recognizing the development of a theme or central idea. It will also focus on identifying the complexity of characters; including different cultures and beliefs. It will address the production of clear and coherent writing based on the theme, or characters. This class is for students with significant disabilities who access the Arizona Alternative Academic Standards.  
**Prerequisite:** As determined by student’s IEP  
**Credit:** 1  
**Location:** All | |
| **Literacy and Language Arts Essentials 5-6**  
Students will address basic reading, writing, speaking, and listening skills. Emphasis is on using 2 or more pieces of evidence to support inferences in literary or informational text. It will also focus on determining 2 or more themes/central ideas, and compare different cultures. It will address author’s point of view, claims, fact, or opinion. ELA 5-6 will include instruction in writing that is organized, uses transitions, and is clear and coherent. This class is for students with significant disabilities who access the Arizona Alternative Academic Standards.  
**Prerequisite:** As determined by student’s IEP  
**Credit:** 1  
**Location:** All | |

| **Literacy and Language Arts Essentials 7-8**  
Students will address basic reading, writing, speaking, and listening skills. Emphasis is on expanding instruction in using 2 or more pieces of evidence to support inferences in literary or informational text, and determining 2 or more themes/central ideas while comparing/contrasting different cultures. It will focus on the student using analysis to determine author’s claim as fact or opinion and challenge those ideas. It will include instruction in writing that is organized, uses transitions, and descriptive details. This class is for students with significant disabilities who access the Arizona Alternative Academic Standards. | Prerequisite: As determined by student’s IEP  
Credit: 1  
Location: All |
| **Reading Strategies**  
Students who need instruction in basic reading and reading comprehension skills should take this course. Emphasis will be on reading comprehension, vocabulary development and strategies for accessing grade-level reading materials. | Prerequisite: As determined by student’s IEP  
Credit: 1 (Elective)/Repeatable  
Location: All |
| **Speech and Debate**  
Students will focus on the various techniques of public speaking and prepare various types of speeches, such as persuasive, impromptu, and oratory. Students will additionally learn and practice the techniques of debate. | Prerequisite: None  
Credit: 1/Repeatable  
Location: All |
| **Speech and Debate 3-4**  
Students will learn speech writing, argumentation, philosophy, research, and delivery skills, as well as literary analysis, interpretation, and current events. Students will hone skills in effective written and spoken communication, comprehensive philosophical backgrounds for arguments based on theory, efficient and discriminating research skills, and proficient literary interpretation. Students will be required to use their skills in advanced acting, rhetoric, public speaking, and debate to produce and compete in a minimum of six (6) National Speech and Debate Association (NSDA) and Arizona Interscholastic Association (AIA) nationally sanctioned competitive events. | Prerequisite: None  
Credit: 1  
Location: WCHS |
| **Advanced Creative Writing**  
Students will explore themes and write various modes of creative writing. Students will apply their knowledge of writing to brainstorming, drafting, revising, editing, and publishing their work. This is an advanced level course. | Prerequisite: Creative Writing  
Credit: .5(elective)/Repeatable  
Location: All |
| **Creative Writing**  
Students will explore themes and write various modes of creative writing. Students will apply their knowledge of writing to brainstorming, drafting, revising, editing, and publishing their work. | Prerequisite: None  
Credit: .5(elective)/Repeatable  
Location: All, iSchool |
| **Creative Writing: Unleashing the Core of Your Imagination**  
Students will gain a solid grounding in the writing process, from finding inspiration to build a basic story, as well as learning complicated literary techniques to create poetry and prose. | Prerequisite: None  
Credit: .5(elective)  
Location: iSchool |
| **Gothic Literature**  
Students will focus on the major themes found in Gothic literature and demonstrate how the core writing drivers produce, for the reader, a thrilling psychological environment. Terror versus horror, the influence of the supernatural, and descriptions of the difference between good and evil are just a few of the themes presented. | Prerequisite: None  
Credit: .5(elective)  
Location: iSchool |

### Description

**Intro to Art**

Students will study elements and principles of design as well as techniques for both two and three dimensional materials. Areas of study include drawing, painting, graphic design, printmaking, and sculpture.

**Prerequisite:** None  
**Credit:** 1  
**Location:** All

**Drawing 1-2**

Students will examine basic drawing techniques (perspective, shading, shapes, forms, line, graphic drawing, landscape and composition). Students will be exposed to a variety of media. Students will work toward development of a portfolio.

**Prerequisite:** Intro to Art or Cambridge Art  
**Credit:** 1  
**Location:** All

**Drawing 3-4**

Students will explore advanced drawing techniques. Focus will be on development of personal drawing style, originality and life drawings. Portfolio development will continue for culminating in a presentation at the end of the semester. Exhibition of artwork is a required aspect of the class.

**Prerequisite:** Drawing 1-2  
**Credit:** 1/Repeatable  
**Location:** All

**Ceramics 1-2**

Students will be introduced to the fundamentals of ceramic arts by exploring hand building techniques: pinch, coil and slab. Surface decoration such as glazing, staining and other techniques will be examined.

**Prerequisite:** None  
**Credit:** 1  
**Location:** All

**Ceramics 3-4**

Students will learn functional and sculptural forms using hand building methods. Basic wheel throwing and mold making will be introduced. A variety of clay bodies, glazes, decorative techniques and firing methods will be used.  
*Exhibition of artwork is a required aspect of the class.

**Prerequisite:** Ceramics 1-2  
**Credit:** 1  
**Location:** All

**Ceramics 5-6/ 7-8**

Students work towards portfolio pieces by perfecting their craft while challenging themselves to create more complex pieces. Students are able to make pieces and experiment with multiple techniques beyond glaze.

**Prerequisite:** Ceramics 3-4  
**Credit:** 1/Repeatable  
**Location:** All

**Painting 1-2**

Students will examine color theory and painting techniques. In addition, they will explore media approaches, techniques, surfaces and technologies. Students will be able to understand the relationship between art, culture and self. All students will develop a portfolio for presentation.

**Prerequisite:** None  
**Credit:** 1/Repeatable  
**Location:** All

### PERFORMING ARTS – THEATER

<table>
<thead>
<tr>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
</table>
| **Stagecraft Design & Production 3-4**  
Students will build on the skills learned in Stagecraft Production 1-2 with an emphasis on stage production, design, and production leadership. Advanced skills and techniques are developed through the completion of more complex hands-on projects. Students will have opportunities to become crew heads, assistants and stage managers. Students will become familiar with career and occupational opportunities within the field and will have an opportunity to show their work, make design presentations and present portfolios for review by industry professionals. A commitment to after school, evenings, weekends and CTSO participation (the student organization) is expected. | **Prerequisite:** Stagecraft Production 1-2  
**Credit:** 1/ CTE  
**Location:** SRHS, VVHS, WCHS |
| **Stagecraft Design & Production Internship**  
Students will experience on-the-job training in a career path. Requirements include three weeks of classroom instruction in job preparation and application and 60 hours per semester of on the job field work. Artifacts include a complete portfolio, two employer evaluations, two instructor field evaluations, a final, written summary and reflection. Students must provide their own transportation to the internship site. | **Prerequisite:** Stagecraft Production 3-4  
**Credit:** 1/ CTE  
**Location:** SRHS, VVHS, WCHS |
| **Theater, Cinema and Film Production**  
Students will be introduced to the basics of film and theater production. Elements of lighting, sound, wardrobe and camerawork will be studied. Addition, the history of film and theater will be examined. | **Prerequisite:** None  
**Credit:** 1/ Elective  
**Location:** iSchool |
### Description

**Theory of Knowledge 1-2**  
This is an interdisciplinary course that looks at all of the disciplines. Students learn to analyze and evaluate what they learn and how they think. Students will also be expected to think about how others in different cultures might view things differently.  

**Prerequisite:** Acceptance into IB Diploma Program  
**Credit:** 1  
**Fees:** IB Candidate fees  
**Location:** WCHS

**IB Business Management SL 1-2**  
This course will cover business organization, accounting/finance, marketing, and human resources. The course will examine business practices from a global perspective. This course will fulfill the free enterprise graduation credit.  

**Prerequisite:** None  
**Credit:** 1  
**Fees:** Exam Fees  
**Location:** WCHS

**IB Instrumental Music SL 1-2**  
The IB Instrumental Music Course will give students a familiarity with musical genres and styles as they relate to the international picture. In their study of world music, students will examine musical structure, elements, terminology and notations, historical and cultural context. Students will be assessed in Performance and/or Composition, depending on the level selected.  

**Prerequisite:** Audition with Instructor  
**Credit:** 1  
**Location:** WCHS

**IB Theater Arts SL 1-2 / IB Theater Arts HL 1-2, 3-4**  
Students may choose to take this course at the Standard or Higher Level. At both levels, students are required to participate in a school production as part of their exploration into theatre.  

**Prerequisite:** None  
**Credit:** 1 per year  
**Fees:** Exam Fees  
**Location:** WCHS

**IB Math Applications SL 1-2**  
This course is a combination of statistics, trigonometry, calculus and real world/global math. This course is recommended for students planning to pursue fields in the social sciences, or general studies.  

**Prerequisite:** Cambridge 3-4 or Algebra 3-4  
**Credit:** 1  
**Fees:** Exam Fees  
**Location:** WCHS

| **IB Math SL 1-2**  
Mathematics SL is a course for students who already have a strong mathematics background in Algebra and Geometry. The course will focus on seven topics within mathematics, namely: Algebra, Functions and Equations, Circular Functions and Trigonometry, Matrices, Vectors, Statistics and Probability, and Calculus. The aims of the course focus on an appreciation for mathematics in the multicultural and historical viewpoints. | Prerequisite: None  
Credit: 1 each  
Fees: Exam fees  
Location: WCHS |
| **IB Math Analysis and Approaches SL 1-2/ IB Math Analysis and Approaches SL 3-4**  
This two year course is for students who have a strong mathematics background in Algebra and Geometry. This course will focus on Functions, Logarithms, Trigonometry, Reasoning and Proof, Calculus, and Statistics. This course is recommended for students planning to pursue technical fields such as engineering, medical professions, sciences, and mathematics. | Prerequisite: Cambridge 3-4 or Algebra 3-4  
Credit: 1 each  
Fees: Exam fees  
Location: WCHS |
| **IB Physics SL 1-2 / IB Physics HL 1-2 / IB Physics HL 3-4**  
Physics is the most fundamental of the experimental sciences as it seeks to explain the universe itself, from the very smallest particles to the vast distances between galaxies. Despite the exciting and extraordinary development of ideas throughout the history of physics, observations remain essential to the very core of the subject. Models are developed to try to understand observations, and these themselves can become theories that attempt to explain the observations. | Prerequisite: None  
Credit: 1  
Fees: Exam Fees  
Location: WCHS |
| **IB Psychology SL 1-2 / IB Psychology HL 1-2 / IB Psychology HL 3-4**  
This course is an exploration of human behavior. Students will examine psychology through the behavioral, cognitive, biological perspective. Students will also look at Social Psychology. | Prerequisite: None  
Credit: 1  
Fees: Exam Fees  
Location: WCHS |
| **IB Chemistry SL 1-2 / IB Chemistry HL 1-2 / IB Chemistry HL 3-4**  
Chemistry is an experimental science. It will focus on physical and chemical properties, equations, and reactions. Students will also examine states of matter, chemical bonds, kinetics, equilibrium, oxidation and organic chemistry. There will be a focus on laboratory experimentation and analysis. | Prerequisite: Biology 1-2 & Chemistry 1-2  
Credit: 1  
Fees: Exam Fees  
Location: WCHS |
| **IB Visual Arts SL 1-2**  
This is a course for students who are seriously interested in the Visual Arts and includes studio work and Investigative Work Book which are quite demanding. The IB Visual Arts course stresses practice in the use of various 3-dimensional media, primarily clay, the acquisition of ceramics and sculpture techniques, the mature development of creative ideas and the ability to relate to all forms of art in their many social and historical contexts. The requirements for both HL and SL are the same at all levels, but there are some differences in the assessment criteria depending on the choice of level. | Prerequisite: None  
Credit: 1  
Fees: IB Candidate Fees  
Location: WCHS |
| **IB Film HL 1-2 / IB Film HL 3-4**  
Film is both a powerful communication medium and an art form. The Diploma Programme film course aims to develop students’ skills so they become adept in both interpreting and making film texts. Through the study and analysis of film texts and exercises in film-making, the Diploma Programme film course explores film history, theory and socio-economic background. The course develops students’ critical abilities, enabling them to appreciate the multiplicity of cultural and historical perspectives in film. To achieve an international understanding within the world of film, students are taught to consider film texts, theories and ideas from differing points of view. | Prerequisite: None  
Credit: 1  
Fees: IB Exam Fee  
Location: WCHS |

</tr>
</tbody>
</table>
| Students will develop Algebra 3-4 concepts while remediating fundamental algebraic skills for students who did not achieve mastery in Algebra 1-2. Students will extend algebraic and geometric concepts and apply these to polynomial, radical (including complex), rational, exponential (with real coefficients) and logarithmic functions. Students will examine data on two quantitative variables to choose functions to make conclusions in context of the data. | **Prerequisite:** Algebra 1-2 or Geometry  
**Credit:** 1  
**Location:** All, iSchool |
| **Algebra 3-4**                      | Students will study functions and relations, systems of equations and inequalities including, exponential, logarithmic, polynomial, rational, radical, exponential, logarithmic and trigonometric functions. A graphing calculator is strongly recommended. | **Prerequisite:** Geometry 1-2  
**Credit:** 1  
**Location:** All, iSchool |
| **Algebra Honors 3-4**               | Students will study functions and relations, systems of equations and inequalities including: logarithmic, polynomial, rational, radical, exponential, logarithmic and trigonometric functions. A graphing calculator is strongly recommended. This course provides a more rigorous approach to the topics covered in Algebra 3-4 as preparation of Trigonometry/Pre-Calculus Honors, AP or IB programs. | **Prerequisite:** Geometry 1-2 or Geometry Honors 1-2  
**Credit:** 1  
**Location:** All, iSchool |
| **College Algebra**                  | Students will focus on the analysis and interpretation of the behavior and nature of functions including polynomial, rational, exponential, logarithmic, power, absolute value, and piecewise-defined functions; systems of equations, using multiple methods including matrices, modeling and solving real world problems, and defining and illustrating sequences and series. *Course may be offered for Dual Enrollment pending instructor availability (Math 151). | **Prerequisite:** Algebra 3-4 or Algebra Honors 3-4  
**Credit:** 1  
**Location:** All campuses |
| **Statistics 1-2**                   | Students will study basic concepts and applications of statistics, including data description, estimation and hypothesis tests. A graphing calculator is strongly recommended. *Course may be offered for Dual Enrollment pending instructor availability (Math 206 Statistics). | **Prerequisite:** Algebra 3-4  
**Credit:** 1  
**Location:** All |
| **AP Statistics**                    | Students will conduct an exploratory analysis of data with an emphasis on interpreting information from a variety of sources; Students will plan and conduct a study using sampling and experimentation. Additionally, students will anticipate patterns utilizing probability and simulation. *Students are expected to take the AP Exam. *College credit may be earned | **Prerequisite:** Algebra 3-4  
**Credit:** 1  
**Fees:** AP Exam Fee  
**Location:** All, iSchool |
| **Probability and Statistics**       | Students will be introduced to exploring data, sampling and experimentation by planning and conducting studies, anticipating patterns using probability and simulation, and employing statistical inference to analyze data and draw conclusions. | **Prerequisite:** Algebra 3-4  
**Credit:** 1  
**Location:** iSchool |
| **Precalculus**                      | Students will solve and graph functions including polynomial, rational, exponential, logarithmic, and trigonometric. Trigonometric identities are incorporated to connect the solutions and algebra skills for trigonometric functions. *Course may be offered for Dual Enrollment pending instructor availability (Math 151/182). | **Prerequisite:** Algebra 3-4  
**Credit:** 1  
**Location:** All, iSchool |

*Location: All  
*Students are expected to take the AP Exam.  *College credit may be earned.

Students will go through a study of limits, continuity, differentiation, and integration of algebraic, trigonometric and transcendental functions, and the applications of derivatives and integrals.

Students will explore limits, continuity, differential and integral calculus of functions of one variable.  
*Course may be offered for Dual Enrollment pending instructor availability (Math 221)  
*Students are expected to take the AP Exam.  *College credit may be earned.

Students will study techniques of integration for both proper and improper integrals with applications to the physical and social sciences, elements of analytic geometry, and the analysis of sequences and series.  
*Course may be offered for Dual Enrollment pending instructor availability (Math 231)  
*Students are expected to take the AP Exam.  *College credit may be earned.

Students will study basic financial planning concepts and illustrate how these concepts apply to everyday life. Topics covered include career planning and development, goal setting, personal budgeting, cash flow analysis, financial statements, tax planning, use of credit, savings and investment programs, changes in housing situations, major consumer purchases, insurance needs, retirement, and estate planning.

Students will address basic number sense, algebra and geometry, statistics and functions, and life skills. Emphasis is on identifying positive and negative numbers, applying money and time skills in real world situations. This class is for students with significant disabilities who access the Arizona Alternative Academic Standards.

Students will address basic number sense, algebra and geometry, statistics and functions, and life skills. Emphasis is on adding and subtracting decimals, multiplying and dividing whole numbers, and identifying parts of a right triangle in real world objects. This class is for students with significant disabilities who access the Arizona Alternative Academic Standards.

Students will address basic number sense, algebra and geometry, statistics and functions and life skills. Emphasis is on being able to identify different parts of an expression, writing and solving number problems, and solving real-world problems. This class is for students with significant disabilities who access the Arizona Alternative Academic Standards.

### Description

#### Academic Strategies
Students will learn skills in organization, reading, note taking, test taking, study skills, time management skills, communication and self-advocacy with an emphasis on application of strategies to content areas.

#### Academic Tutorial
Students will focus on Academic Tutorial completion of general classroom assignments and pre-teaching and/or re-teaching of key concepts from the general education curriculum.

#### AP Seminar
Students will engage in cross-curricular conversations that explore the complexities of academic and real-world topics and issues by analyzing divergent perspectives. Using an inquiry framework, students practice reading and analyzing articles, research studies, and foundational, literary, and philosophical texts; listening to and viewing speeches, broadcasts, and personal accounts; and experiencing artistic works and performances.

#### Community, Home and Life Extension 1-8
Students will participate in learning environment along with activities that are age/ability appropriate in socialization and independence in the domestic, recreational/leisure and community domains which will occur in a variety of integrated settings. Students will receive instruction through activities that include hygiene, health and safety, appropriate work behavior and money skills.

## NON-DEPARTMENTAL COURSES

<table>
<thead>
<tr>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
</table>
| **Honors Academic Decathlon**      | Prerequisite: None  
Students will be exposed to the integrated nature of human experience. Students will conduct research and critical inquiry into a broad array of academic disciplines and communication skills covering this year’s theme. Students will evaluate material covered in the course from ethical, aesthetic, and intellectual perspectives. Students will master the basic content knowledge requirements of the academic areas of art, economics, language, literature, music, physical or social science, speech and the super quiz topic. Participation in at least one competition is required.  
Credit: 1/Repeatable/ Elective  
Location: All |
| **JROTC (Army)**                   | Prerequisite: Written Consent Parent/Guardian  
Students will participate in JROTC activities. The stated mission is “to motivate young people to be better citizens.” It consists of both classroom and field experience. As a cadet, students will earn the privilege of participating in Spring Camp and Summer Camp. Competitive teams include: Raiders, color guard, rifle, and drill.  
Credit: 1/Repeatable  
Location: DHS |
| **Leadership 1-2**                 | Prerequisite: None  
Students will build real world leadership and public speaking skills. In this course students will participate in event planning, goal setting, mentoring, tutoring and team building. Students will become an active part of building a positive school culture amongst peers.  
Credit: 1  
Location: All |
| **Principles of Public Service**   | Prerequisite: None  
Students will focus on parts of public service, a field that focuses on building healthy societies. Public Service includes many different types of careers, but they all have in common with the goal of working for others. This course will explore some of the most common career paths in public service. Working for the public also comes with a very specific set of expectations since protecting society is such an important mission.  
Credit: .5  
Location: iSchool |
| **Professional Internship**        | Prerequisite: Must have own transportation  
Students, who are juniors or seniors, will find or be assisted in obtaining opportunities to realistically investigate professional fields based on their career goals and future employment. The students will receive training on employability skills, educational perspective, and information on career demands, outlook, advantages and disadvantages. Grades will be pass/fail and based on work attendance, completion of coursework in Schoology via reflections on the work experience and an exit interview. The students employer will need to sign off on the hours work and assessment of the student’s performance as an employee. Prior to the student being enrolled in the class the student must complete the Student Information Form/ Contract. Students are responsible for their own transportation. 130 work hours will equate to a credit. 130 total work hours / 65 work hours per semester.  
Credit: 1/ Repeatable  
Location: All |
| **Ready to Work 1-8**              | Prerequisite: Determined by student IEP  
Students will address the basic, workplace skills of students with significant disabilities who access the Arizona Alternate Academic Standards. The focus of Ready to Work is on prerequisite career development skills. It introduces students to the world of work and develops programs that involve students in real, workplace situations. Students will complete activities that focus on work readiness such as effective oral, written, and listening communication skills. Student will also complete activities that focus on decision-making in school or the workplace. The course is aligned to the Arizona Workplace Standards.  
Credit: 1  
Location: All |
| **School to Work Extension 1-8**   | Prerequisite: Determined by student IEP  
Students will participate in a vocational course that provides job readiness experience and possible training on a job site within the school or community. Areas addressed will include job readiness skills, self-advocacy/self-determination and independent living.

Location: All |
# NON-DEPARTMENTAL COURSES

<table>
<thead>
<tr>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
</table>
| **Student Council**  
Students will focus on refining and implement leadership skills. This class gives practical experience in the areas of planning, conducting, coordinating, and developing leadership and responsibility.  
*Students are elected in a student body election.*  
Prerequisite: Elected as a student body officer  
Credit: 1/Repeatable  
Location: All |  |
| **Work Based Learning**  
Students, who are juniors or seniors, may participate in the work based learning program outside of the school day. The course will be recorded as an additional period in Infinite Campus. Grades will be pass/ fail and based on work attendance, completion of coursework in Schoology via reflections on the work experience and an exit interview. The students employer will need to sign off on the hours worked and assessment of the student's performance as an employee. Prior to the student being enrolled in the class, the student must complete the Student Information Form/ Contract. Students are responsible for their own transportation.  
130 work hours/65 hours per semester, will equate to a credit. *A maximum of 2 credits can be earned and cannot be combined with Professional Internship.*  
Prerequisite: Must have own transportation  
Credit: 1/ Repeatable  
Location: All |  |
| **Advertising and Sales Promotion**  
Students will learn how these marketing campaigns, ads, and commercials are brought to life and meet some of the creative folks who produce them as well as learn about different marketing career opportunities.  
Prerequisite: None  
Credit: .5/ Elective  
Location: iSchool |  |
| **Careers in Criminal Justice**  
Students will explore different areas of the criminal justice system, including the trial process, the juvenile justice system, and the correctional system.  
Prerequisite: None  
Credit: .5/ Elective  
Location: iSchool |  |
| **Criminology**  
Students will study the field of Criminology – the study of crime. They will look at possible explanations for crime from the standpoint of psychological, biological and sociological perspectives, explore the categories and social consequences of crime, and investigate how the criminal justice system handles not only criminals, but also their misdeeds.  
Prerequisite: None  
Credit: .5/ Elective  
Location: iSchool |  |
| **Game Design 1a**  
Students will learn the skills needed to conceptualize, design, and fully create your very own video game by exploring various video game software and hardware, sharpen your coding skills, learn about game storylines, player progression, and algorithmic decision making.  
Prerequisite: None  
Credit: .5/ Elective  
Location: iSchool |  |
| **Game Design 1b**  
Students will go into deeper detail with the skills needed to conceptualize, design, and fully create your very own video game by exploring various video game software and hardware, sharpen your coding skills, learn about game storylines, player progression, and algorithmic decision making.  
Prerequisite: None  
Credit: .5/ Elective  
Location: iSchool |  |
| **Health I- Life Management Skills**  
Students will learn how to promote better health, less stress, and a fuller life for themselves as well as explore lifestyle factors that can influence health.  
Prerequisite: None  
Credit: .5/ Elective  
Location: iSchool |  |
| **Introduction to Military Careers**  
Students will be provide the information needed to gain a broader understanding of Military Careers. Students will learn about the five military branches—Air Force, Army, Coast Guard, Marines Corps, and Navy—and examine various jobs within such as aviation, to medicine, to law enforcement.  
Prerequisite: None  
Credit: .5/ Elective  
Location: iSchool |  |
## Non-Departmental Courses

<table>

</thead>
</table>
| **Law and Order: Introduction to Legal Studies**      | Prerequisite: None  
Students will learn the importance of laws and consider how their application affects us as individuals and communities, understand the court system, and how laws are enacted.  
Credit: .5/ Elective  
Location: iSchool |
| **Learning in a Digital World: Strategies for Success**| Prerequisite: None  
Students will discover what it means to be a responsible digital citizen, expand their digital literacy, and become a successful online student.  
Credit: .5/ Elective  
Location: iSchool |
| **Life Skills: Navigation Adulthood**                  | Prerequisite: None  
Students will learn more about themselves, how to become a valuable contributing member of society, and how to prepare for the future by exploring goal setting, decision making, and surviving college and career.  
Credit: .5/ Elective  
Location: iSchool |
| **National Security**                                  | Prerequisite: None  
Students will learn the critical elements of the job, such as evaluating satellite information, analyzing training procedures, assessing military engagement, preparing intelligence reports, coordinating information with other security agencies, and applying appropriate actions to various threats.  
Credit: .5/ Elective  
Location: iSchool |
| **Nutrition and Wellness**                             | Prerequisite: None  
Students will learn the essential skills needed to pursue a healthy, informed lifestyle.  
Credit: .5/ Elective  
Location: iSchool |
| **Personal and Family Finance**                        | Prerequisite: None  
Students will learn how to spend and save money wisely, investing in safe opportunities, and the days ahead by learning key financial concepts around taxes, credit, and money management.  
Credit: .5/ Elective  
Location: iSchool |

| **Boys/Girls Physical Education/Health Sciences**  
Students will develop skills in team and individual sports, personal fitness and health related activities. Students will study the complexities of body and mind and how to maintain good health. Physical Education clothes are required. | **Prerequisite:** None  
**Credit:** 1  
**Fees:** Uniform/Locker Fee  
**Location:** All, iSchool |
| **Unified Physical Education**  
Unified Physical Education is based on the Special Olympics Unified Sports® Program. Unified Sports® combines students with intellectual disabilities (athletes) and students without disabilities (partners) for sports training and competition. Sports include athletics, basketball, bocce, bowling, cheerleading, flag football, floor hockey, soccer, softball, tennis, and volleyball.  
Students will have the opportunity to compete in Special Olympics Arizona Area and State Games | **Prerequisite:** None  
**Credit:** 1/Repeatable  
**Fees:** None  
**Location:** All |
| **Competitive Athletics**  
Students will participate in weight training and physical conditioning routines that compliment their sport of interest. | **Prerequisite:** Approval of Head Coach  
**Credit:** 1/Repeatable  
**Fees:** Locker Fee  
**Location:** All |
| **Competitive Athletics Honors**  
Students will participate in weight training and physical conditioning routines that compliment the sport of their interest. In addition to the requirements of the regular class, students in the honors track will be required to compose essays on five topics and take additional test concepts that assess their understanding of core concepts. | **Prerequisite:** Approval of Head Coach  
**Credit:** 1/Repeatable  
**Fees:** Locker Fee  
**Location:** All |
| **Yoga Fitness**  
Students will learn the skills of various yoga techniques. By the end of class, students will be able to perform their own yoga sequences so they can continue incorporating yoga into their daily life. Through the class students will strengthen and stretch muscles, improve balance and focus. Students will also study healthy habits as a means of improving quality of lives.  
*Equipment:* Students need to provide their own yoga mat. | **Prerequisite:** None  
**Credit:** 1  
**Fees:** Locker Fee  
**Location:** All |
| **Sports Officiating**  
Students will learn to officiate sports at an introductory level. Areas of study include: officiating and rules and regulations of team sports. | **Prerequisite:** PE  
**Credit:** 1/ Elective  
**Fees:** None  
**Location:** All |

| Students will participate in physical training activities such as: Olympic style lifts, plyometrics, speed training, and nutrition. Students will be expected to create their own workout, as well as instruct other students on proper lifting techniques and safety.  
*This course may be repeated for credit.          |                                                                         |
| **Physical Education: Sports Fundamentals 1-8**  | **Prerequisite:** As determined by student’s IEP<br><br>**Credit:** 1<br><br>**Location:** All |
| Sports Fundamentals 1-8 is designed to provide the fundamental skills needed to participate in lifelong sports activities according to the student's ability and need.  
*This course may be repeated for credit.          |                                                                         |
## SCIENCE

### One-Credit Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
</table>
| Biology 1-2                               | Students will explore the cell, molecular basis of heredity, interdependence of organisms, biological evolution, energy and organization in living systems. This course satisfies the lab requirement for state universities. | **Prerequisite:** Completion of 1 core Science Class  
**Credit:** 1  
**Location:** All, iSchool                                                                                           |
| Biology 1-2 Honors                        | Students will explore cell structure, genetics and ecology. A high level of reading ability, self motivation, and recording of lab observations will be expected. This course satisfies the lab requirement for the state universities. | **Prerequisite:** Previous Science teacher approval  
**Credit:** 1  
**Location:** All, iSchool                                                                                           |
| Conceptual Physics 1-2                    | Students will explore motion, force, density, sound, light, electricity, temperature, magnetism and basic atomic/quantum theory. This course satisfies the lab requirement for state universities. Prerequisite: Completion of Algebra 1-2 or concurrent enrollment in Algebra 1-2. | **Prerequisite:** Completion of Algebra 1-2 or concurrent enrollment  
**Credit:** 1  
**Location:** All                                                                                                     |
| Conceptual Physics 1-2 Honors             | Students will apply mathematical thinking to mechanics, electricity and magnetism, heat and modern physics. This course is designed for the academically motivated student. This course satisfies the lab requirement for state universities. | **Prerequisite:** Completion of Algebra 1-2 or concurrent enrollment  
**Credit:** 1  
**Location:** All                                                                                                     |
| Integrated Science 1-2                    | Students will examine the Earth's interconnected systems and how they change due to natural processes. The study of matter and energy will be explored in this course, as they are the driving forces of systems interactions both on Earth and the Universe. This course satisfies the integrated lab science requirement for state universities. | **Prerequisite:** None  
**Credit:** 1  
**Location:** All                                                                                                     |

<tbody>
<tr>
<td><strong>Chemistry 1-2</strong></td>
<td>Students will investigate the structure and properties of matter and the changes it can undergo. Topics include the structure of the atom and relationship to the periodic table, formation of molecules, and chemical reactions. This course satisfies the lab requirement for state universities.</td>
</tr>
<tr>
<td></td>
<td><strong>Prerequisite:</strong> Completion of Biology 1-2 and Algebra 1-2</td>
</tr>
<tr>
<td></td>
<td><strong>Credit:</strong> 1</td>
</tr>
<tr>
<td></td>
<td><strong>Location:</strong> All, iSchool</td>
</tr>
<tr>
<td><strong>Chemistry Honors 1-2</strong></td>
<td>Students will examine the nature of physical and chemical changes, with emphasis on quantitative analysis. A high level of reading and math ability, as well as self motivation will be expected. This course satisfies the lab requirement for the state universities.</td>
</tr>
<tr>
<td></td>
<td><strong>Prerequisite:</strong> Completion of Biology 1-2 and Algebra 1-2</td>
</tr>
<tr>
<td></td>
<td><strong>Credit:</strong> 1</td>
</tr>
<tr>
<td></td>
<td><strong>Location:</strong> All, iSchool</td>
</tr>
<tr>
<td><strong>Environmental Science 1-2</strong></td>
<td>Students will analyze the relationships of living organisms to both living and nonliving components of ecosystems. Human impact on natural systems will also be explored. This course satisfies the integrated lab science requirement for state universities. Also integrates Chemistry concepts.</td>
</tr>
<tr>
<td></td>
<td><strong>Prerequisite:</strong> Biology 1-2 &amp; completion of 2 core science courses</td>
</tr>
<tr>
<td></td>
<td><strong>Credit:</strong> 1</td>

</tr>
<tr>
<td></td>
<td><strong>Location:</strong> All</td>
</tr>
<tr>
<td><strong>Anatomy/Physiology 1-2</strong></td>
<td>Students will explore structure and function of the human body in health and disease. Specific chemistry concepts are studied as they relate to the human body. This course does include dissections.</td>
</tr>
<tr>
<td></td>
<td>*May be offered for Dual Enrollment pending instructor availability.</td>
</tr>
<tr>
<td></td>
<td><strong>Prerequisite:</strong> Biology 1-2 &amp; Completion of 3 core science courses. Concurrent enrollment in 3rd core science allowed</td>
</tr>
<tr>
<td></td>
<td><strong>Credit:</strong> 1</td>
</tr>
<tr>
<td></td>
<td><strong>Location:</strong> All, iSchool</td>
</tr>
<tr>
<td><strong>Anatomy/Physiology 1-2 Honors</strong></td>
<td>Students will explore the structure and function of the major human body systems. This advanced level course serves as preparation for medical sciences and will include multiple lab practicals as a way of assessing student knowledge. This course does include dissections. Honors Anatomy and Physiology satisfies the advanced lab course requirement for the state universities. Students may receive dual enrollment credit for Bio 160 pending instructor availability.</td>
</tr>

</table>
| **Botany and Zoology 1-2**  
Students will examine plant structure and function, growth, development and reproduction. Zoology will be explored through the classification of the animal kingdom, and involve dissections. This course is approved as a biology credit for Arizona Board of Regents; therefore, it is only recommended as a fourth science credit. | **Prerequisite:** Biology 1-2 & completion of 3 core science courses  
**Credit:** 1  
**Location:** All |
| **Physical Science**  
Students will investigate concepts of chemistry and physics, as well as mathematical applications. This laboratory-centered course involves students in building conceptual and mathematical models, as well as hands-on lab experiences. This course satisfies the integrated lab science requirement for state universities. | **Prerequisite:** Completion of Biology and one other core science course.  
**Credit:** 1  
**Location:** All |
| **AP Biology**  
Students will investigate the biochemical, homeostatic, and metabolic aspects of cell function, as well as gene regulation, the chromosomal and molecular basis of inheritance, human physiology, biotechnology, evolution, and ecology. Students are expected to take the AP Exam through which college credit may be earned. Students may receive dual enrollment credit for Bio 182 pending instructor availability. | **Prerequisite:** Biology 1-2 & Chemistry 1-2 (Preferably with an 80% or more)  
**Credit:** 1  
**Fees:** AP Exam Fee  
**Location:** All, iSchool |
| **AP Chemistry**  
Students will use both qualitative and quantitative analysis techniques to explore matter and the changes that it undergoes. This course is equivalent to a first year college chemistry course. Students are expected to take the AP Exam through which college credit may be earned. Students may receive dual enrollment credit for Chem 130 pending instructor availability. | **Prerequisite:** Biology 1-2 & Chemistry 1-2  
**Credit:** 1  
**Fees:** AP Exam Fee  
**Location:** All |
| **AP Environmental Science**  
Students will focus on scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world. Students identify and analyze environmental problems that are natural and human-made. Students are expected to take the AP Exam through which college credit may be earned. Students may receive dual enrollment credit for Bio 105 pending instructor availability. | **Prerequisite:** Biology 1-2 & Chemistry 1-2  
**Credit:** 1  
**Location:** iSchool, All |
| **AP Physics 1**  
Students will examine Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; mechanical waves and sound. It will also introduce electric circuits. This two-semester lab science course is the equivalent to a first-semester college course in algebra-based physics. Students are expected to take the AP Exam through which college credit may be earned. Students may receive dual enrollment credit for Physics 111 pending instructor availability. | **Prerequisite:** Biology 1-2 & Chemistry 1-2 and concurrent enrollment in Algebra 3-4  
**Credit:** 1  
**Location:** All |
| **AP Physics 2**  
Students will explore fluid mechanics; thermodynamics; electricity and magnetism; optics; atomic and nuclear physics. This two-semester lab science course is the equivalent to a second-semester college course in algebra-based physics. Students are expected to take the AP Exam through which college credit may be earned. | **Prerequisite:** Physics 1-2 or AP Physics 1 (1-2)  
**Credit:** 1  
**Location:** All |

| **AP Physics C**                              | **Prerequisite:** Physics 1-2 or AP Physics 1 or AP Physics 2 and concurrent enrollment in Calculus  
| Students will examine mechanics, electricity, and magnetism. The sequence is parallel to or proceeded by mathematics courses including calculus. The sequence is more intensive and analytic than the B course. Students are expected to take the AP Exam through which college credit may be earned. | Credit: 1  
| **Fees:** AP Exam Fee  
| **Location:** All |                                                                 |
| **Science Essentials 1-2**                    | **Prerequisite:** As determined by student's IEP  
| Students will address all four areas. In Scientific Inquiry, students will use the scientific process throughout the year while focusing on the three types of science. In Earth and Space Science, the focus will be on the human impact on the environment. In Life Science, the focus will be on organisms (plants and animals). In Physical Science, the focus will be on Energy. | Credit: 1  
| **Location:** All |                                                                 |
| **Science Essentials 3-4**                    | **Prerequisite:** As determined by student’s IEP  
| Students will address all four areas. In Scientific Inquiry, students will use the scientific process throughout the year while focusing on the three types of science. In Earth and Space Science, the focus is on Earth geological processes. In Life Science, the focus is on biological processes. In Physical Science, the focus is on chemistry. | Credit: 1  
| **Location:** All |                                                                 |
| **Science Essentials 5-6**                    | **Prerequisite:** As determined by student’s IEP  
| Students will address all four areas. In Scientific Inquiry, students will use the scientific process throughout the year while focusing on all three types of science. In Earth and Space Science, the focus is on the solar system. In Life Science, the focus is on the Human body and its functioning. | Credit: 1  
| **Location:** All |                                                                 |
| **Forensics 1-2**                              | **Prerequisite:** Biology 1-2 & completion of 3 core science courses  
| Students will learn how to lift fingerprints, footprints, as well as collect and analyze DNA evidence. | Credit: 1  
| **Location:** All |                                                                 |
| **Forensics: The Science of the Crime**       | **Prerequisite:** None  
| Students will explore the role science and technology play in this fascinating and growing career by learning the specialized skills and techniques used during a crime scene investigation and how evidence and data is expertly collected, preserved, and analyzed. | Credit: 1 (elective)  
| **Location:** iSchool |                                                                 |
| **Forestry and Natural Resources 1-2**        | **Prerequisite:** None  
| Students will learn forest ecology, management, and conservation. Topics include environmental policy, land use, water resources, and wildlife management as well as forestry related careers and important issues facing forestry professionals today. | Credit: 1 (elective)  
| **Location:** iSchool |                                                                 |
| **Marine Science 1-2**                        | **Prerequisite:** None  
| Students will explore how vital the ocean is to our existence. With a focus on conservation, students study marine animals, their interactions with each other and environment. Students tour the evolving seafloor, trenches, volcanoes, and ridges. Students discover waves, currents, tides, and other interactions between ocean and land. Students study the impacts on our blue planet and how they affect water, atmosphere, and climate. | Credit: 1 (elective)  
<p>| <strong>Location:</strong> iSchool |                                                                 |</p>

<tr>
<td><strong>Agriscience II: Sustaining Human Life</strong></td>
<td>Prerequisite: None</td>
</tr>
<tr>
<td>Students will build on existing knowledge of plant science and delve deeper into important areas such as soil science and weed management. This course covers horticulture and plant science trends from creating hybrid species to growing edible plants in unlikely places.</td>
<td>Credit: .5 (elective) Location: iSchool</td>
</tr>
<tr>
<td><strong>Astronomy</strong></td>
<td>Prerequisite: None</td>
</tr>
<tr>
<td>Students will be introduced to the study of astronomy, its history and development, basic scientific laws of motion and gravity, the concepts of modern astronomy, and the methods used by astronomers to learn more about the universe. Additional topics include the solar system, the Milky Way and other galaxies, and the sun and stars. Using online tools, students will examine the life cycle of stars, the properties of planets, and the exploration of space.</td>
<td>Credit: .5 (elective) Location: iSchool</td>
</tr>
<tr>
<td><strong>Biotechnology</strong></td>
<td>Prerequisite: None</td>
</tr>
<tr>
<td>Students will explore the history of biotechnology, including early attempts at food preservation, the development of antibiotics, and changes to food crops around the world. Students will learn more about some of the challenges of biotechnology, such as the growth of antibiotic resistant bacteria and questions about the safety of commercially produced genetically modified organisms. Students will also research new biotechnologies.</td>
<td>Credit: .5 (elective) Location: iSchool</td>
</tr>
<tr>
<td><strong>Concepts of Engineering and Technology</strong></td>
<td>Prerequisite: None</td>
</tr>
<tr>
<td>Students will learn more about engineering and technology careers and what skills and knowledge is need to succeed in these fields. Students will explore innovative and cutting-edge projects that are changing the world we live in and examine the design and prototype development process.</td>
<td>Credit: .5 (elective) Location: iSchool</td>
</tr>
<tr>
<td><strong>Great Minds in Science</strong></td>
<td>Prerequisite: None</td>
</tr>
<tr>
<td>Students will explore ten of today’s greatest scientific minds. Each unit takes an in-depth look at one of these individuals, and shows how their ideas may help to shape tomorrow’s world.</td>
<td>Credit: .5 (elective) Location: iSchool</td>
</tr>
<tr>
<td><strong>Introduction to Manufacturing, Product Design, and Innovation</strong></td>
<td>Prerequisite: None</td>
</tr>
<tr>
<td>Students will learn about the different types of manufacturing systems used to create the everyday products we depend on and how exciting, creative, and practical this industry can be. Students will discover the various career opportunities in the manufacturing industry, including those for engineers, technicians, and supervisors. As a culminating project, students will plan their own manufacturing process and create an entirely original product.</td>
<td>Credit: .5 (elective) Location: iSchool</td>
</tr>
<tr>
<td><strong>Introduction to Renewable Technologies</strong></td>
<td>Prerequisite: None</td>
</tr>
<tr>
<td>Students will discover the cutting-edge field of renewable energy and the exciting new technologies that are making it possible. This course will explore new ways of generating energy and storing that energy, from biofuels to high-capacity batteries and smart electrical grids. Students will also learn about the environmental and social effects of renewable technologies and examine how people’s energy decisions impact policies.</td>

## One-Credit Courses
- World History
- World History Honors
- AP World History
- AP United States History
- US/Arizona History
- AP United States Government and Politics
- AP Comparative Government and Politics
- Social Studies Essentials 1-2
- Social Studies Essentials 3-4
- Social Studies Essentials 5-6

## One-Credit Elective Courses
- AP Human Geography
- Principles of Agriculture, Food, and Natural Resources
- Sociology
- Psychology
- AP Psychology

## .5 Credit Elective Courses
- Archeology
- AP Macroeconomics
- AP Microeconomics

## Description

### World History
Students will explore a variety of people, events, and movements in world history with a focus on inquiry into the impact of social, geographic, political and economic influences on historical events including the study of peoples of Africa, the Americas, Asia and Europe.

### World History Honors
Students will research, read, write about and critically analyze topics such as: World Belief Systems; Interegional Interactions; Revolutions in Thought; Politics and Industry; World War One; World War Two; Genocides; Cold War; and Contemporary Global Issues, etc. This honors course will dive deeply and at a more rigorous pace into a variety of people, events, and movements in world history with a focus on inquiry into the impact of social, geographic, political and economic influences on historical events including the study of peoples of Africa, the Americas Asia and Europe.

### AP World History
Students will investigate significant events, individuals, developments, and processes from approximately 8000 B.C.E. to the present. The course provides opportunities for students to make connections regarding interaction between humans and the environment; development and interaction of cultures; state building, expansion, and conflict; creation, expansion, and interaction of economic systems; and development and transformation of social structures.
*Students are expected to take the appropriate AP Exam.
*May also be offered as Dual Enrollment credit: HIS 110-111, pending instructor availability.

</thead>
</table>
| **American and Arizona Government**                                         | Prerequisite: None  
Credit: .5  
Location: All, iSchool |
| Students will explore history, principles, and foundations of our republic to prepare students to become active citizens. A comprehensive study of civics will be approached from many angles and perspectives with a focus on inquiry, foundations of governments, structures, elections, civil rights and liberties, public and foreign policies, etc. |
| **Principles of Economics**                                                 | Prerequisite: None  
Credit: .5  
Location: All, iSchool |
| Students will explore the economic reasoning process to make informed decisions in a wide variety of contexts. This course will align and comply to that of Arizona State Social Science Standards. |
| **AP Human Geography**                                                      | Prerequisite: None  
Credit: 1 (elective)  
Location: All, iSchool |
| Students will learn the patterns and processes that impact the way humans understand, use, and change Earth's surface. Students use geographic models, methods, and tools to examine human social organization and its effect on the world in which we live. Students are challenged to use maps and geographical data to examine spatial patterns and analyze the changing interconnections among people and places.  
*Students are expected to take the AP Exam* |
| **Principles of Agriculture, Food, and Natural Resource**                   | Prerequisite: None  
Credit: .5 (elective)  
Location: iSchool |
| Students will learn about all of the steps in the journey of farm to table, beginning with the history of agriculture through animal husbandry, plant science, and managing the use of natural resources. |
| **Sociology**                                                              | Prerequisite: None  
Credit: 1 (elective)  
Location: All, iSchool |
| Students will explore topics such as socialization, social structures, deviance, race/ethnicity, religion, gender, social institutions, and collective behavior. This is an introductory course that will focus on the study of human interactions and group behavior. |
| **Psychology**                                                             | Prerequisite: None  
Credit: 1 (elective)  
Location: All |
| Students will focus on the scientific study of mental processes and behavior. This course will survey the scientific basis of psychology using the various theories and approaches of examining behavior over time. The topics will include: historical and modern perspectives, research methods, the biological basis of behavior, memory, cognition, learning, development, motivation, personality, intelligence, social psychology, psychological disorders and treatments. |
| **AP Psychology**                                                          | Prerequisite: Psychology  
Credit: 1 (elective)  
Fee: AP Exam Fee  
Location: All,iSchool |
| Students will study human behavior and mental processes. This course focuses on the psychologists and studies that have shaped the field, students explore and apply psychological theories, key concepts, and phenomena associated with topics such as: biological bases of behavior; sensation and perception; learning, cognition and motivation.  
*Students are expected to take the AP Exam*  
*May also be offered as Dual Enrollment credit: PSY 101, pending instructor availability.* |
| **Archeology**                                                             | Prerequisite: None  
Credit: .5 (elective)  
Location: iSchool |
<p>| Students will learn how archaeological research is conducted and interpreted, as well as how artifacts are located and preserved. Students will also examine the relationship of material items to culture and what we can learn about past societies from these items.George Santayana once said, “Those who cannot remember the past are condemned to repeat it.” The field of archeology helps us to better understand the events and societies of the past that have helped to shape our modern world. This course focuses on this techniques, methods, and theories that guide the study of the past. |</p>

</table>
| **Chinese I**  
Students will learn the basic Chinese language. The course starts by introducing students to a general knowledge of Pinyin, Mandarin Chinese, Chinese dialects, and Chinese characters. Students will be able to engage in conversation in Chinese including greeting people, introducing themselves, and exchanging basic information with others. Students learn to count from 1 to 1000 and make simple sentences in both spoken and written Chinese. They also learn 160 "magical" Chinese characters and use them on a variety of topics. | **Prerequisite:** None  
**Credit:** 1  
**Location:** iSchool |
| **Chinese II**  
Students will learn to further develop the communicative skills of listening, speaking, reading and writing Mandarin Chinese at a more advanced level. Students are immersed in Chinese culture as virtual exchange students. Virtual excursions from one Chinese city to another expand students vocabulary by helping them learn how to interact with others and appropriately use terms to communicate in a variety of everyday situations. | **Prerequisite:** Chinese I  
**Credit:** 1  
**Location:** iSchool |
| **Chinese III Honors**  
Students will continue to expand their abilities in various aspects of Chinese Mandarin. Students continue to build their knowledge of vocabulary, sentence patterns, and grammar points in communicative contexts. They also enhance their Chinese Mandarin listening and speaking skills, such as pronunciation and intonation. Students learn more in-depth Chinese reading and writing strategies and skills. | **Prerequisite:** Chinese I & II  
**Credit:** 1  
**Location:** iSchool |
| **French 1-2**  
Students will focus on grammar, proper verb forms (i.e., agreement of verb and subject as well as gender), basic everyday expressions, and vocabulary Students will be introduced to the cultures and geographies of France. | **Prerequisite:** None  
**Credit:** 1  
**Location:** All, iSchool |
| **French 3-4**  
Students will focus on new and old grammar, practice French in meaningful ways, and develop their listening, speaking, reading, and writing skills. In addition, students will enhance their knowledge and understanding of French culture. | **Prerequisite:** French 1-2  
**Credit:** 1  
**Location:** All, iSchool |
| **French 5-6 Honors**  
Students will continue expanding their French fluency in speaking, listening, reading and writing. This course includes role-play and writing skills used to build vocabulary and fluency, as well as to increase knowledge of French culture. | **Prerequisite:** French 3-4  
**Credit:** 1  
**Location:** All |
| **AP French Language and Culture**  
Students will engage in an exploration of culture in both contemporary and historical contexts. The course develops students' awareness and appreciation of cultural products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions). | **Prerequisite:** None  
**Credit:** 1  
**Fee:** AP Exam Fee  
**Location:** All |
| **Japanese 1-2**  
Students will focus on reading and writing skills in Japanese with an emphasis on phonology and orthography. Students will develop a broader cultural and humanistic perspective. | **Prerequisite:** None  
**Credit:** 1  
**Location:** Valley Vista |

### Description

**Graphic Design 1-2**
Students will be introduced to design principles used in Graphic Design and Digital Communication fields. This is a survey course in which students will learn about the basic elements and principles of art and design through the use of photography and the Adobe Creative Suite including InDesign, Illustrator and Photoshop. The class will be project-based with an emphasis on career and personal use. This is a challenging course, and each student is expected to be self-motivated, responsible and able to work independently to meet deadlines. College credit may be offered through dual enrollment with Maricopa County Community College District.

**Graphic Design 3-4**
Students will continue to go beyond the skills developed in Graphic Design 1-2. The course emphasis will be on teaching students advanced Adobe Photoshop, Illustrator, InDesign, and Acrobat techniques. Additionally, students will apply sophisticated layout, design and graphic creation processes in the production of a wide variety of real-world print, web, and digital media artifacts. College credit may also be offered via dual enrollment through the Maricopa Community College District.

**Graphic Design 5-6 Honors**
Students will apply skills learned in Graphic Design 1-4. In this project-based course, students will function as real-world, freelance, graphic communications entities. During the course of the year, students will acquire clients from the school, school district, or local community fulfilling their individual graphic communication needs. At the end of the course, students will have created a digital and/or print portfolio of their work to be used for job interviews, college admissions packages, and internship assignments. College credit may also be offered via dual enrollment through the Maricopa Community College District.

| Students will participate in a project-based course introducing techniques for computer animation in the areas of 2-D and 3-D animation. The three phases of production (pre-production, production and post-production) are taught in detail and used for all projects. Specific topics that are covered are storyboarding, keyframing, scene composition and lighting, Stop Action animation, Rotoscoping, Web Banners, 3-D modeling, and basic coding. Computer animation concepts will utilize software applications such as Adobe Flash and Blender. Students will create 2-D and 3-D animations to produce engaging, real world, digital experiences. Students will begin to explore career options. | Prerequisite: None  
Credit: 1  
Location: VVHS, SRHS |
| **Computer Animation 3-4**                                   |         |
| Students will participate in the next level of this project-based course allowing students to continue on the career path laid out in Computer Animation 1-2. This includes further investigation into 2-D and 3-D techniques such as lip syncing, game design, video integration, creation of complex 3-D worlds, custom textures, and advanced coding. Computer animation concepts may utilize programs such as Blender, Autodesk Maya, Adobe Creative tools and HTML5. Students will construct engaging animation clips as well as short games. Students will explore further career opportunities as well as possible internships in animation and game design. | Prerequisite:  
Computer Animation 1-2

Students will further their understanding of the technical computer application side of video and multimedia production as it relates to over-the-air, cable, and closed circuit broadcasting. Working from the foundational skills developed in the TV/Broadcast Production 1-2 course, students will develop advanced techniques and skills. Students will also be responsible for key studio functions such as anchors and managers in the production of live and pre-recorded media acting as lead persons for the production of the school’s daily video announcements as well as students’ own location and studio projects. This course requires after-school work to meet deadlines and cover newsworthy events. | Prerequisite: TV/Broadcast Production 1-2  
Credit: 1  
Location: WCHS, DHS, VVHS, SRHS |
| **TV/Broadcast Production 5-6 Honors**  
Students will lead, mentor and produce a portfolio-type creation of video and multimedia production as it relates to over-the-air, cable, and closed circuit broadcasting. Working from the intermediate skills developed in the two previous TV/Broadcast Production courses, students will develop advanced techniques in interviewing, story development, on-air talent, multi-camera usage, lighting techniques, news gathering, sound utilization, and pre- and post-production work. Students will be responsible for mentoring, leading, and training underclassmen during the production of the school’s daily video announcements. This course requires after school work to meet deadlines and cover newsworthy events throughout campus, the district, and community. | Prerequisite: TV/Broadcast Productions 3-4 Honors  
Credit: 1  
Location: WCHS, DHS, VVHS, SRHS |
| **IB Film HL 1-2; IB Film HL 3-4**  
Students will develop skills to become adept in both interpreting and making film texts. Through the study and analysis of film texts and exercises in film-making, the Diploma Program film course explores film history, theory and socio-economic background. The course develops students’ critical abilities, enabling them to appreciate the multiplicity of cultural and historical perspectives in film. To achieve an international understanding within the world of film, students are taught to consider film texts, theories and ideas from differing points of view. | Prerequisite: None  
Credit: 1  
Fee: IB Exam Fee  
Location: WCHS |
| **Film & TV Internship**  
Students will experience on-the-job training in a career path. Requirements include three weeks of classroom instruction in job preparation and application and 120 hours per year of on the job field work. Artifacts include a complete portfolio, two employer evaluations, two instructor field evaluations, a final, written summary and reflection. Students must provide their own transportation to the internship site. | Prerequisite: Application  
Credit: 1/Repeatable  
Location: DHS, WCHS, VVHS |

| **Law Enforcement 1-2**  
Students will be introduced to basic concepts of the civil and criminal judicial systems. Special emphasis will be placed on physical conditioning, discipline and basic law enforcement principles and practices in daily life. | Prerequisite: None  
Credit: 1  
Location: VVHS |
| **Law Enforcement 3-4**  
Students will apply academic and technical knowledge and skills to a variety of settings within law enforcement. Students will be exposed to various aspects of law enforcement. Participation in the Police Explorer Program is encouraged. Students will be subjected to a background check and fingerprinting as a part of this course. | Prerequisite: Law Enforcement 1-2  
Credit: 1  
Location: VVHS |
| **Law Enforcement 5-6**  
Students will apply advanced technical knowledge and skills to a variety of settings within law enforcement. Students will be exposed to various aspects of law enforcement administrative functions. Participation in the Explorer program is encouraged. Students will be subject to background check and fingerprinting as part of this course. | Prerequisite: Law Enforcement 3-4  
Credit: 1  
Location: VVHS |
| **Law and Public Safety Internship**  
Students will experience on-the-job training in a career path. Requirements include three weeks of classroom instruction in job preparation and application and 120 hours per year of on the job field work. Credit: 1/Repeatable  
Location: VVHS |
| **Fire Science 1-2**  
Students will apply academic, technical knowledge and skills to a variety of settings within the firefighting response. This course is designed with lessons in fire behavior, safety, building construction, nutrition and wellness, fire department equipment and tools as well as the history and culture of the fire service. Students will collaborate in community service projects with local charities and fire departments. | Prerequisite: None  
Credit: 1  
Location: VVHS |
| **Fire Science 3-4 Honors**  
Students will apply advanced academic knowledge, technical knowledge, and skills to a variety of settings within firefighting and emergency response. This course is designed to acquaint students with various aspects of the firefighting professions through training in rope rescue, vehicle extrication, fire hydraulics, the chemistry of fire behavior, helicopter operations, command procedures, public life safety education projects, oral board interviewing, and more. A partnership with the Surprise Fire Department and hospitals will provide the opportunity for off-campus experiences or a professional internship. Participation in the program’s Career and Technical Student Organizations is required. Students in this class will compete locally, regionally, and nationally. | Prerequisite: Fire Science 1-2  
Credit: 1  
Location: VVHS |

## Education Professions One-Credit Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Education Professions 1-2</td>
<td>Students will experience the wide range of educating youth, including teaching, coaching, counseling and administration. Students will begin to develop their educational philosophy, build sound pedagogical practices, and study optimal learning environments. Students will participate in ongoing field experience with veteran teachers, coaches, counselors and others in the education field. Dual credit may be obtained from the Maricopa County Community College system for this program. Students enrolled in the Ed Professions program will participate and be affiliated with the national organization, Educators Rising.</td>
<td>Prerequisite: None        &lt;br&gt; Credit: 1                &lt;br&gt; Location: All</td>
</tr>
<tr>
<td>Education Professions 3-4</td>
<td>Students will work in the field of education enabling them to investigate the wide world of educating youth on a deeper level. Students will continue to develop their educational philosophy, build sound pedagogical practices, and study optimal learning environments. In addition, communication skills, lesson planning, teaching methods, classroom responsibilities, educational issues professional development and classroom management skills will be emphasized in class. Students will continue to participate in ongoing field experience with veteran teachers, coaches, counselors and others in the field of education. Dual credit may be obtained from the Maricopa County Community College system for this program. Students participating in Education Professions 3-4 will be members of and affiliated with the national organization, Educators Rising.</td>
<td>Prerequisite: Education Professions 1-2  &lt;br&gt; Credit: 1            &lt;br&gt; Location: All</td>
</tr>
<tr>
<td>Education Professions 5-6 Service Learning</td>
<td>Students will continue to work in the field of education by using community-based learning done through service projects that benefit community organizations. Students will foster civic responsibility by creating and implementing a service-learning project of their choosing. This class supports and provides resources for hands-on individual and group volunteering. Dual credit may be obtained from the Maricopa County Community College system for this class. Students participating in Education Professions 5-6 will be members of and affiliated with the national organization, Educators Rising.</td>

CTE – ENGINEERING SCIENCES & INFORMATION TECHNOLOGY

### Engineering One-Credit Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Engineering 1-2</td>
<td>Students will be exposed to the design process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards and technical documentation. This project-based class allows students to employ engineering and scientific concepts in the problem-solving process. Students will use state of the art 3D solid modeling design software and robotics systems. Student Organization: SkillsUSA</td>
</tr>
<tr>
<td>Engineering 3-4</td>
<td>Students will develop a further understanding of engineering and technology, address design problems using a solution-finding process and select optimal design. Intermediate Engineering provides students with the opportunity to develop skills and understanding of course concepts through activity-, project- and problem-based learning. Students will use interactive 3D design engineering software, robotic systems, machining technology as well as 3D and Laser printing technologies. Student Organization: SkillsUSA</td>
</tr>
<tr>
<td>Engineering 5-6 Honors</td>
<td>Students will continue to develop an understanding of engineering and technology, address design problems using a solution-finding process and select optimal design. Advanced Engineering provides students with the opportunity to develop skills and understanding of the different concepts and disciplines of engineering through activities, projects and problem-based learning. Students will design and build a solar go-kart as well as building competition robots. Students will use interactive 3D design engineering software, robotic systems, Machining technology as well as 3D printing and Laser engraving technologies. Concepts will include the study of simple machines, circuits, mechanics of material, static and dynamics. Student Organization: SkillsUSA</td>
</tr>
<tr>
<td>Engineering 7-8 Honors</td>
<td>Students will use the engineering process to gather information about problems in their community and develop working solutions. The projects will span various disciplines of the engineering spectrum and will vary depending on the community’s needs. The course will follow the framework of the EPICS program developed by ASU. Students will form design teams, research community needs and build a workable solution. The class is designed to be a capstone to the engineering curriculum and combine the skills students have developed in high school in all of their classes. Student Organization: SkillsUSA</td>

| **Engineering Internship**  
Students will experience on-the-job training in a career path. Requirements include three weeks of classroom instruction in job preparation and application and 120 hours per year of on the job field work. Artifacts include a complete portfolio, two employer evaluations, two instructor field evaluations, a final, written summary and reflection. Students must provide their own transportation to the internship site. | Prerequisite: Application  
Credit: 1/Repeatable  
Grade: 12  
Location: SRHS, WCHS |
| **Coding 1-2**  
Students will learn how information technology systems operate. This course introduces principles of computers, basic concepts of computer maintenance and network technologies with an emphasis on software development. Students will also acquire an understanding of the IT industry, computer mathematics, and the evolution of the computer. | Prerequisite: None  
Credit: 1  
Location: SRHS, WCHS |
| **Coding 3-4**  
Students will apply software theory and programming methods to the solutions of authentic business data problems. This course will offer the skills necessary to competently perform in the industry, as well as pass the necessary exams to obtain certification. | Prerequisite: Coding 1-2  
Credit: 1  
Location: SRHS, WCHS |

| **Medical Lab Assistant 1-2**  
Students will attain skills in phlebotomy procedures, specimen procurement and sample processing, basic laboratory testing, patient processing, medical terminology, office procedures/skills, and medical laboratory techniques. Instruction includes communication, interpersonal and professional skills, appropriate scientific principles of microbiology, chemistry, and hematology integrated into skill development and clinical learning. | **Prerequisite:** None  
**Credit:** 1  
**Location:** WCHS  

**Medical Lab Assistant 3-4 Honors**  
Students will continue their learning of Medical Laboratory Assistant 1-2 and the culmination of this Allied Health strand. In addition to attaining expertise in phlebotomy procedures and building on the skills developed in the prior course, this course offers hands-on experiences in the classroom lab including capillary punctures, urinalysis and blood smears. Upon successful completion of this course, students will have the opportunity to take a National Certification Exam for Phlebotomy Technician (CPT). | **Prerequisite:** Medical Lab Assistant 1-2  
**Credit:** 1  
**Location:** WCHS  

**Laboratory Assisting Internship**  
Students will experience on-the-job training in a career path. Requirements include three weeks of classroom instruction in job preparation and application and 120 hours per year of on the job field work. Artifacts include a complete portfolio, two employer evaluations, two instructor field evaluations, a final, written summary and reflection. Students must provide their own transportation to the internship site. | **Prerequisite:** Application  
**Credit:** 1/Repeatable  
**Location:** WCHS  

**Nursing Professions 1-2**  
Students will be introduced to the healthcare community, examine the legal and ethics involved in nursing, apply our current knowledge of infection control and safety, identify mental health and social service needs, practice measuring and recording vital signs and provide basic emergency and personal care for patients in this semester long course. Students must provide their own transportation to lab sites. Membership in the student organization: HOSA is recommended. Participation in this class will prepare students for a Certified Nursing Assistant Licensure after the completion of Nursing Professions 3-4.  
*Completion or concurrent enrollment in Chemistry 1-2 or equivalent  
*Open to Seniors only through application process  
*Must provide own transportation | **Prerequisite:** Successful completion of Biology 1-2 or equivalent  
**Credit:** 1 per semester  
**Location:** WCHS  
**Campus Availability:**  
1st & 2nd Hour open to DHS, SRHS, VVHS

**Location:** WCHS  
**Campus Availability:** 1st & 2nd Hour open to DHS, SRHS, VVHS  
5th & 6th Hour open to WCHS |  |
| **Sports Medicine 1-2** |  |
| Students will receive an introductory level course designed for students interested in fields such as athletic training, physical therapy, medicine, and physiology of exercise, biomechanics, and other sports medicine-related fields. Students will practice the concepts of patients’ rights, quality of care, communication skills, teamwork, decision-making and legal and ethical issues. The introductory course includes coursework in the following areas: prevention, evaluation, treatment, and rehabilitation of common sports injuries, health care administration, nutrition and insurance issues. Advanced anatomy including the musculoskeletal, nervous, and circulatory and respiratory system will be emphasized throughout the course.  
*This course may be offered for dual enrollment credit through Rio Salado Community College pending instructor availability. |  |
| **Prerequisite:** None  
**Credit:** 1  
**Location:** All |  |
| **Sports Medicine 3-4 Honors** |  |
| Students will practice Sports Medicine and Rehabilitation Therapies (Sports Medicine 2) which is designed for students interested in fields such as athletic training, physical therapy, medicine, physiology of exercise, biomechanics, and other sports medicine related fields. The course covers prevention, treatment, and rehabilitation of advanced sports injuries, taping and wrapping of injuries, and emergency procedures. In addition, students will practice the concepts of nutrition, sports psychology, rehabilitation with therapeutic modalities, and fitness/conditioning/strength programs. Observation hours in various off-campus sports medicine settings will be required, so students must possess a driver’s license, reliable transportation and proof of insurance. Students must get approval from parents, in writing, to ride with licensed classmates.  
*This course may be offered for dual enrollment credit through Rio Salado Community College pending instructor availability.* |  |
| **Prerequisite:** Sports Medicine 1-2  
**Credit:** 1  
**Location:** All |  |
| **Sports Medicine 5-6 Honors** |  |
| Students will build on the skills learned in Sports Medicine 3-4H, with an work-based learning opportunities, professional skill standards, and industry credential readiness. Advanced skills and industry readiness, are developed through the completion of more client-based, hands-on projects. Students will have opportunities to work with the athletic department and competitive PE courses to develop and carry out programs. Students will become familiar with career and occupational opportunities within the field and will have an opportunity to show their work, design programs, and present portfolios for review by industry professionals. Students will also be re-certified in CPR, First Aid, and Automated External Defibrillation. A commitment to after school, evenings, and CTSO participation (the student organization) is expected. |  |
| **Prerequisite:** Sports Medicine 3-4 Honors  
**Credit:** 1  
**Location:** All |  |
| **Sports Medicine & Rehabilitation Internship** |  |
| Students will experience on-the-job training in a career path. Requirements include three weeks of classroom instruction in job preparation and application and 120 hours per year of on the job field work. Artifacts include a complete portfolio, two employer evaluations, two instructor field evaluations, a final, written summary and reflection. Students must provide their own transportation to the internship site. |  |
| **Prerequisite:** Application  
**Credit:** 1/Repeatable  
**Location:** All |  |

### Description

#### Automotive Technology 1-2
Students will be introduced to automotive systems for the general public/consumers. Auto 1 will have an emphasis on general work safety. Following units focus on working with hand tools, electric equipment, pneumatic and hydraulic tools, and basic car maintenance and systems inspection. Auto 2 allows students to continue to explore automotive systems by using interactive computer training equipment that simulates real automotive systems along with work on real auto parts. This is a great course for anyone interested in knowing more about cars.

- **Prerequisite:** None
- **Credit:** 1
- **Location:** DHS

#### Automotive Technology 3-4
Students will continue the exploration of automotive systems. This is ideal for students who are interested in a career in the Automotive field. Students will perform standard inspections, maintenance and repair of: HVAC, Auto Transmission, Manual Transmissions, Engine, Steering and Suspension and Electrical systems. Students will train to use industry standard automotive service and test equipment such as ECU scan tools, computerized wheel alignment equipment and wheel mounting equipment, and advanced engine performance diagnostic equipment.

- **Prerequisite:** Automotive Technology 1-2
- **Credit:** 1
- **Location:** DHS

#### Automotive Technology 5-6 Honors
Students will prepare for taking the ASE national tests, entering advanced automotive training programs, and working in entry level automotive positions. This course is for students who want to work in the automotive industry as an Engineer, Technician, Parts and Service Management, or Business Management. Students will participate in authentic learning experiences in which they will provide a service to an organization or business.

- **Prerequisite:** Automotive Technology 3-4
- **Credit:** 1
- **Location:** DHS

#### Automotive Technology 7-8 Honors
Students will be provided with additional classroom lab time for extended hands-on experiences. These real world, authentic activities reinforce workplace skills necessary to master this Career and Technical Education Program. Students will participate in authentic learning experiences in which they will provide a service to an organization or business.

- **Prerequisite:** Automotive Technology 5-6 Honors
- **Credit:** 1
- **Location:** DHS

#### Automotive Technologies Internship
Students will experience on-the-job training in a career path. Requirements include three weeks of classroom instruction in job preparation and application and 120 hours per year of on the job field work. Artifacts include a complete portfolio, two employer evaluations, two instructor field evaluations, a final, written summary and reflection. Students must provide their own transportation to the internship site.

- **Prerequisite:** Application
- **Credit:** 1/Repeatable
- **Location:** DHS

| **Aesthetics**                           | **Prerequisite:** Credit: 1 credit in both English & Algebra 1 (or higher) with a C or better  
2.25/semester  
**Grade:** 11-12  
**Fee:** May require fee  
**Location:** See counselor |
| This one-year program specializes in the study of skin care and provides in-depth instruction on a variety of skin care services. The curriculum will include giving facials, skin analysis, pore cleansing, skin care regimens, waxing, eyebrow shaping, lash tinting and aromatherapy techniques. Upon completion of the program, students may test to receive a certification with the Arizona Board of Cosmetology. |

| **Air Conditioning Technician**          | **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
Credit: 2/semester  
**Grade:** 11-12  
**Fee:** May require fee  
**Location:** See counselor |
| This one year program introduces students to the basic elements of heating, ventilation, and air conditioning systems. Students will have the opportunity to analyze electrical systems, perform maintenance repairs, troubleshoot and install air conditioning and heating units. Upon completion of the program, students may test to receive a certification with the National Center for Construction and Education Research (NCCER), Snap-On, OSHA-10. |

| **Collision Repair & Refinishing**       | **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
Credit: 3/year  
**Grade:** 11-12 (2 year program)  
**Fee:** May require fee  
**Location:** See counselor |
| This two-year program teaches the basic principles and terminology of the auto body repair industry. This hands-on repair program teaches metal work, basic painting and color matching, cost estimation, industry safety protocol, structural analysis, computer diagnostic systems, and welding in collision repair. Upon completion of the two-year program, students may test to receive Inter-Industry Conference on Auto Collision Repair (I-CAR) certification. |

| **Automotive Technology**                | **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
Credit: 3/year  
**Grade:** 11-12 (2 year program)  
**Fee:** May require fee  
**Location:** See counselor |
| This two-year program, teaches students all aspects of automotive repair and maintenance including engine performance, engine repair, brakes, steering, suspension, and alignment, and electrical systems. Upon completion of the two-year program, students may take the Automotive Service Excellence (ASE) Certification Exam. |

| **Aviation Maintenance Technology**      | **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
Credit: 6/year  
**Grade:** 11-12 (2 year program)  
**Fee:** May require fee  
**Location:** See counselor |
| This two-year program teaches the maintenance and repair of aircraft mechanical systems including turbine and reciprocating engines, aircraft finishes, sheet metal, welding, landing gears, hydraulics, propellers and much more. Upon completion of 1,952 hours of training, students 18 years of age or older may test for Federal Aviation Administration (FAA) Airframe and Powerplant certification. Must be available for summer sessions - June and July for 8-hour days. |

| **Avionics/Drone Electronics**          | **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
Credit: 3/year  
**Grade:** 11-12 (2 year program)  
**Fee:** May require fee  
**Location:** See counselor |
| This two-year program is designed to educate students on electronics within the aviation industry. Students will learn avionics installation, troubleshooting, system integration and avionics operating systems, including GPS systems, autopilot, communication systems, and weather radar. Upon completion of the program, students may test to receive a certification with the Federal Communications Commission (FCC). |

For detailed information about West-MEC 2021-2022 course offerings, visit their website at www.west-mec.org
### Law and Public Safety
This two-year program explores the basic skills used in patrol functions, defensive tactics, use of force and first aid. Students will learn constitutional law, forensic science, first aid/CPR and more. Upon completion of the two-year program, students may test to receive a certification in Arizona Security License, First Aid, CPR, AED and FEMA Incident Command System Certifications.

**Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
**Credit:** 3/year  
**Grade:** 11-12 (2 year program)  
**Fee:** May require fee  
**Location:** See counselor

### Medical Assisting
This one or two-year program prepares students with the necessary clinical and administrative knowledge to become entry-level medical assistants. Students will receive hands-on training and learn how to properly administer injections, take vital signs, record EKGs, implement basic accounting procedures, and understand the fundamentals of patient documentation. Upon completion of the program, students may test to receive a certification with the American Heart Association CPR/AED, Registered Medical Assistant, Registered Phlebotomy Technician.

**Prerequisite:** 1 credit of English with a C or better; 1 credit of a lab science with a C or better (2 year program)  
**Credit:** 3/year  
**Grade:** 11-12 (1 year program)  
**Credit:** 2.75/semester  
**Grade:** 12  
**Fee:** May require fee  
**Location:** See counselor

### Medium/Heavy Diesel Technology
This two-year program teaches students the maintenance and repair of diesel systems found in medium-heavy equipment like trucks, buses, cranes, tractors, and more. Students will use computers to troubleshoot and diagnose electrical systems, brakes, suspension, steering, and hydraulics using Snap-on Tools technology and equipment. Upon completion of the two-year program, students may take the Automotive Service Excellence (ASE) Certification Exam, Snap-on, OSHA-10.

**Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
**Credit:** 3/year  
**Grade:** 11-12 (2 year program)  
**Fee:** May require fee  
**Location:** See counselor

### Nursing Services
The Nursing Services one-year program prepares students with the necessary clinical and administrative knowledge to become entry-level nursing assistants. Students will receive hands-on training and learn how to properly administer basic nursing care, understand bodily system and vital signs, practice client-centered care and critical thinking, work on patient advocacy, teamwork and professionalism, practice patient hygiene care, collect basic specimens and maintain patient records and proper ethics.

**Prerequisite:** 1 credit in Algebra II, 2 credits of English, 2 Lab Science (1 must be Biology) with a C or better  
**Credit:** 1.5/semester  
**Grade:** 12  
**Fee:** May require fee  
**Location:** See counselor

### Pharmacy Science
This one-year program teaches students the delivery of pharmaceutical services alongside licensed pharmacists in a pharmacy setting. The program teaches medical terminology, pharmacy law, quality customer service, pharmacology, preparing prescription medications, and administrative duties such as inventory of drugs and pharmacy operations. Upon completion of the one-year program, students may test to receive Pharmacy Technician Certification Board (PTCB) Certification, American Heart Association CPR/AED.

**Prerequisite:** 1 credit each of English, a lab science and Algebra I with a C or better  
**Credit:** 1.5/semester  
**Grade:** 12  
**Fee:** May require fee  
**Location:** See counselor

| Powersports Technology       | **Description:** This two-year program prepares students with technical skills to service, maintain and diagnose Powersport vehicles, such as Motorcycles, All-Terrain Vehicles (ATV’s), Utility Terrain Vehicles (UTV’s), and Personal Watercraft. Students receive hands-on training in two-stroke and four-stroke engines, drive-train systems, suspension, brakes, electrical diagnosis, and engine management systems. West-MEC programs prepare students to seek one or more industry certification or licensure in their field of study, providing a pathway to economic independence.  
  **Details:**  
  **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
  **Credit:** 3/year  
  **Grade:** 11-12 (2 year program)  
  **Fee:** May require fee  
  **Location:** See counselor |
| Precision Machining          | **Description:** This two-year program exposes students to precision manufacturing and computer numerically-controlled machining. Students will gain insight on the select tools and materials needed to make durable goods, read blueprints, comprehend CNC theory and procedures, utilize machine shop math, etc. Upon completion, students may test to receive a certification with the National Institute of Metalworking Skills.  
  **Details:**  
  **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
  **Credit:** 3/year  
  **Grade:** 11-12 (2 year program)  
  **Fee:** May require fee  
  **Location:** See counselor |
| Veterinary Science           | **Description:** This one or two-year program will teach students how to deliver medical care to domestic, exotic and large animals, i.e. cats, dogs, reptiles, birds. Students will have the opportunity to draw an animal’s blood and collect other lab specimens, clean teeth, administer medication as prescribed by a licensed veterinary technician and/or veterinarian, witness surgeries, and help the veterinary team with animal nursing. Upon completion of the program, students may test to receive a certification with the National Association of Veterinary Technicians in America.  
  **Details:**  
  **1 year program:**  
  **Prerequisite:** 1 credit in both English, a Lab Science and Algebra 1 or higher with a C or better  
  **Credit:** 3/year  
  **Grade:** 11-12  
  **Fee:** May require fee  
  **Location:** See counselor  
  **2 year program:**  
  **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
  **Credit:** 3/year  
  **Grade:** 11-12  
  **Fee:** May require fee  
  **Location:** See counselor |
| Welding Technology           | **Description:** This two-year program explores the basic skills used in metalworking, manufacturing and industrial production. Students will learn basic safety techniques, sheet metal work, acetylene welding and cutting, electric welding, soldering, plasma cutting, and much more. Upon completion of the program, students may test to receive a certification with the American Welding Society S.E.N.S.E (AWS), Snap-On, OSHA-10, NCCER Welding Levels 1,2&3 Certifications.  
  **Details:**  
  **Prerequisite:** 1 credit in both English & Algebra 1 (or higher) with a C or better  
  **Credit:** 3/year  
  **Grade:** 11-12 (2 year program)  
  **Fee:** May require fee  
  **Location:** See counselor |
CTE COURSE PATHWAYS

CTE- BUSINESS AND MARKETING

Marketing
Location: DHS, VVHS, WCHS, SRHS
The Profession Sales & Marketing program is designed to prepare students for employment in various sales, customer service, advertising and promotion, and first-line supervisory positions in wholesale, retail, and service establishments. The program enables students to explore, understand, and apply marketing, management, and entrepreneurial principles. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

CTE- Communications Media

Graphic Design
Location: DHS, SRHS, VVHS, WCHS
The Graphic Design program is designed to prepare students to apply technical knowledge and skills in the manufacture and distribution or transmission of graphic communications products. In addition to technical skills, students completing this program will also develop advanced critical thinking, career development, applied academics, life management, business, economic and leadership skills required for graphic communications occupations. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.
Media Communications/Journalism
Location: SRHS
The Journalism program is designed to prepare students to apply technical knowledge and professional skills in the making and producing of journalism for television and the communication of dramatic information through the writing and production of news stories across multiple print and online mediums. In addition to technical skills, students completing this program will also develop advanced critical thinking, career development, applied academics, life management, business, economic and leadership skills required for news media occupations. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Digital Photography
Location: DHS
The Digital Photography program provides students interested in areas such as Photojournalism, Still Photography, Portraiture, or Digital Media an opportunity to gain experience with the latest graphic software, digital cameras, and studio equipment. Students will develop individual portfolios, have an opportunity to display their work, and, in the Intermediate and Advanced courses, expand their business sense by finding and serving actual clients both on and off campus. All students can elect to take the Adobe Certified Associate (ACA) exam, which is the graphic design industry’s benchmark test. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.
Animation
Location: VVHS, SRHS
The Animation program introduces students to computer animation techniques using 2D computer images and 3D computer animation. Students will utilize cutting-edge software applications and will create 3-D graphics and animations to produce engaging, life-like digital images and animations with exciting visual effects. Students will also explore career options and opportunities in the digital animation field and also have an opportunity to participate in the Computer Animation & Game Design Club. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Courses must be taken in order listed:

Animation
- Computer Animation 1-2
- Computer Animation 3-4
- Computer Animation 5-6 Honors
- Internship

Film and TV
Location: DHS, SRHS, WCHS, VVHS
The Film & TV program is designed to prepare students to apply technical knowledge and skill in the broadcast journalism, film video, and live or mixed media productions. As well as prepare students for employment in various positions within Radio, TV and Film Industries. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Film and TV Course Sequence

Courses must be taken in order listed:

Film & TV Option 1
- TV/Broadcasting 1-2
- TV/Broadcasting 3-4 Honors
- TV/Broadcasting 5-6 Honors
- Internship

Courses must be taken in order listed:

Film & TV Option 2
- IB FILM HL 1-2
- IB FILM HL 3-4

*Not all courses are available at all schools.
CTE COURSE PATHWAYS

CTE- PUBLIC SERVICE CAREERS

Law and Public Safety
Location: VVHS
The Law, Public Safety and Security instructional program prepares students to perform technical services involved in planning, organizing, researching, directing and controlling functions and process related to the provision of Law, Public Safety and Security Services. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Fire Science
Location: VVHS
The Fire Science program prepares students to perform technical services involved with planning, organizing, researching, directing, and controlling functions and processes related to the provision of Fire Science services. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.
CTE COURSE PATHWAYS

CTE- EDUCATION AND TRAINING

Education Professions
Location: All Schools
The Education Professions program is designed to prepare students for employment or post secondary opportunities in the education field. The program provides instruction in education career choices, education structure and systems, theory, pedagogy, developmental stages, learning styles and methodology. The program also provides interactive experiences with students at different age levels, in a variety of content areas in educational environments. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

CTE- ENGINEERING SCIENCES AND INFORMATION TECHNOLOGIES

Engineering Sciences
Location: SRHS
The Engineering Sciences program is designed for students to explore careers in technology, industry and engineering. Students will explore entry, semi-professional and professional levels of careers through hands-on projects in the area of engineering (transportation, electrical, mechanical, civil power and construction). They will also participate in class activities and projects and hear speakers in the areas of engineering technology and industrial careers. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Engineering Sciences Course Sequence
Software Development
Location: SRHS, WCHS
The Software Development program is designed to prepare students for employment/postsecondary education related to the design, development, installation, implementation, use and management of computers with an emphasis on writing code. An integrated approach of teaching and learning is provided as students enhance their technical knowledge and skills that are associated with functions within Software Development occupations. In addition to the occupation related skills, students completing this program will also develop advanced critical thinking, applied academic, interpersonal relations, life management, business, economic, and leadership skills.

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Courses must be taken in order listed:

Software Development
- Coding 1-2
- Coding 3-4
- Internship

Computer Maintenance 1-2
Location: VVHS
This program prepares students to apply technical knowledge and skill in PC hardware and software systems with an emphasis on PC repair and maintenance. This option will offer skills necessary to competently perform in the industry, as well as pass the necessary exams to obtain certification.

Courses must be taken in order listed:

Computer Maintenance
- Foundations of Computer Maintenance
- Computer Maintenance 1-2
- Internship

Networking and Security 1-2
Location: DHS
This option prepares students to apply technical knowledge and skills to install, configure and troubleshoot basic networking hardware, protocols, and services. In addition to learning basics of network security, students will learn the skills necessary to competently perform in the industry, as well as pass the necessary exams to obtain certification.

Courses must be taken in order listed:

Network Technologies
- Foundations of Network & Security
- Networking & Security 1-2
- Internship
Stagecraft
Location: SRHS, VVHS, WCHS
Stagecraft Design and Production program will prepare students for the design of on-stage productions, scenic and properties design, costume design, light and sound design as well as stage management. Skills and techniques are developed through the completion of complex hands-on projects. Students will have opportunities to eventually become crew heads, designers and stage managers. Students will become familiar with career and occupational opportunities within the field and will have an opportunity to show their work, make design presentations and present portfolios for review by industry professionals.

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Courses must be taken in order listed:
CTE COURSE PATHWAYS

CTE- FAMILY AND CONSUMER SCIENCES

Culinary Arts
Location: VVHS
The Culinary Arts program is designed to prepare students to apply technical knowledge and skills required for food production and service occupations in institutional and commercial food establishments. Skills developed in this program include food identification, selection, and storage; safety and sanitation; personal hygiene; and use of commercial food equipment. Nutrition, special diets, and management of food establishments will also be addressed. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Courses must be taken in order listed:

- Culinary Arts
- Culinary Arts 1-2
- Culinary Arts 3-4
- Culinary Arts Baking & Pastry 5-6 Honors
- Internship

CTE- HEALTH CAREERS

Laboratory Assisting
Location: WCHS
The Laboratory Assisting program prepares students to perform technical services involved with planning, organizing, researching, directing and controlling functions and processes related to the provision of select healthcare services. (Each course is a year long divided into two semesters.)

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Laboratory Assisting Course Sequence

Courses must be taken in order listed:

- Laboratory Assisting
- Medical Lab Assistant 1-2
- Medical Lab Assistant 3-4 Honors & Internship
Nursing Services  
Location: WCHS (1st & 2nd Hour open to DHS, SRHS, VVHS) (5th & 6th Hour open to WCHS)  
The Nursing Professions program prepares students to work in various healthcare industries such as in-home healthcare, hospitals, hospice, etc., while preparing students to take the National Certified Nursing Assistant Exam to receive their Certified Nursing Assistant (CNA) License.  

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Courses must be taken in order listed:  
Nursing Professions 1-2 and Nursing Professions 3-4

Sports Medicine and Rehabilitation  
Location: DHS, SRHS, VVHS, WCHS  
The Sports Medicine and Rehabilitation program prepares students to perform technical services involved with planning, organizing, researching, directing and controlling functions and processes related to the provision of select healthcare services. (Each course is a year long divided into two semesters.)  

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Courses must be taken in order listed:  
Sports Medicine 1-2, Sports Medicine 3-4 Honors, Sports Medicine 5-6 Honors, Internship

CTE- Transportation Technologies

Automotive Technologies  
Location: DHS  
The Automotive Technologies program is designed to prepare individuals for jobs as technicians in the automotive or aerospace fields. (Each course is a year long divided into two semesters.)  

*Students should choose two (2) or more yearlong courses offered in this program in order to complete a course sequence to be considered a concentrator.

Courses must be taken in order listed:  
Automotive Technology 1-2, Automotive Technology 3-4, Automotive Technology 5-6 Honors, Automotive Technology 7-8 Honors OR Internship
