 -

- Future Agenda items
 - Follow up on Volleyball uniforms
 - Volleyball uniforms have not been purchased since the new school colors have been introduced. Michele will obtain a quote to see cost to purchase them. The team will use the basketball jerseys as a substitute until we can order the new volleyball uniforms.
 - Override update
- Next meeting scheduled for December 3, 2020 (if needed)

Volleyball Kit definitions:

Standards - Volleyball poles for the nets.

Reducers - For situations where a larger pole needs to fit inside an existing smaller sleeve or socket.

- Constructed out of solid Aluminum, Steel or Stainless Steel.
- The top half of the Reducer is machined to match your poles inner diameter and the bottom half is machined to match your floor socket's inner diameter.
- Machined stop in middle prevents Reducer from inserting upwards inside the pole.
- Reducers can be slip fit for temporary use or permanently glued or welded for long term use.
- For use for example when a 4" or 3-1/2" diameter pole needs to fit a 3" socket.
- Cost may vary depending on reduction needed and material requested.

Antennas - Volleyball Antenna

Featured snippet from the web

A **volleyball antenna** gives players and the referee a visual aid to judge if a ball is in play or out of bounds as it flies over the net. Choose between 2 fiberglass options in recreational folding or official competition styles.
